Programs

ABSTRACT

The annotated bibliography cites and abstracts 457 documents, originally published from about 1976 through 1987, concerned with the transition of handicapped students from school to work. Citations include journal articles, conference proceedings, project reports, videocassette recordings, presentations, pamphlets, dissertations, bibliographies, and research reports. Although citations are in no particular order, an author index, a descriptor index, and a title index provide access. Also provided is a listing of those documents developed by the Transition Institute at the University of Illinois Which can be obtained through the ERIC (Educational Resources Information Center) system. A "Project Products Listing" is organized by competition number and lists material developed by particular currently funded projects. The OSERS (Office of Special Education and Rehabilitation Services) Project I isting provides contact information for currently funded projects. (DB)

Annotated Bibliography on Transition from School to Work

The following principles guide our research related to the education and employment of youth and adults vith specialized education, training, employment, and adjustment needs.

- Individuals have a basic right to be educated and to work in the environment that least restricts their right to learn and interact with other students and persons who are not handicapped.
- Individuals with varied abilities, social backgrounds, aptitudes, and learning styles must have equal access and opportunity to engage in education and work, and life-long learning.
- Educational experiences must be planned, delivered, and evaluated based upon the uniquε abilities, social backgrounds, and learning styles of the individual.
- Agencies, organizations, and individuals from a broad array of disciplines and professional fields must effectively and systematically coordinate their efforts to meet individual education and employment needs.

- Individuals grow and mature throughout their lives requiring varying levels and types of educational and employment support.
- The capability of an individual to obtain and hold meaningful and productive employment is important to the individual's quality of life.
- Parents, advocates, and friends form a vitally important social network that is an instrumental asrect of education, transition to employment, and continuing employment.

The Secondary Transition Intervention Effectiveness Institute is funded through the Office of Special Education Programs, Office of Special Education and Rehabilitative Services. U.S. Department of Education (contract number 300-85-0160).

PREFACE

This volume of the Annotated Bibliography on Transition from School to Work is the third in the series of monographs documenting the literature in the field of transition. Many different types of documents are cited and abstracted, including journal articles, conference proceedings, project reports, videocassette recordings, presentations, pamphlets, dissertations, bibliographies, research reports—to name a few. We attempt to be broad in scope, but we cannot claim to be comprehensive. There are others who are making similar literature review efforts in specialized areas of transition, such as in work evaluation and federal legislation, and when these resources are found, they are included in our data base.

The method of acquisition includes searching computerized databases, journals, article references, bibliographies, association and agency publications, and most important, soliciting from the OSERS funded projects their reports and products. This volume reflects significantly their contributions, particularly in the form of final reports and video presentations. Project funding is expiring in several competition areas, and perhaps the literature will soon reflect evaluation and follow-up efforts as people take time to write about their experiences. Videocassette recordings are becoming a popular tool to market transition services and to educate parents, employers, and the public as to the goals of national and local transition efforts. Parent involvement literature is growing significantly and is indicative of the importance of parents in their child's transition process.

The organization of Volume 3 is basically the same as that of the previous volumes. Each document has been assigned an entry number that is linked to the author, title, and descriptor indexes. Each document has also been assigned a set of descriptors and an abstract. It is intended that each document citation contain enough bibliographic information to facilitate finding the item through local library services. A "Guide to Entries & Indexes" has been included to help identify key document elements. The "Project Products Listing" allows the user to view at a glance, by competition number, material received from particular projects. Documents that have been contributed by OSERS projects are identified by their competition number and by a number at the end of the citation that corresponds to the "OSERS Project File Listing," which facilitates direct contact with the project. New in the Appendix is the "Transition Institute ERIC Documents Listing" that includes those Institute documents which have been entered into the ERIC data base and are accessible by ED number.

Our growing data base has become a unique resource for documenting state-of-the-art transition products and activities. Again, we would like to thank all of the OSERS projects for responding to our information requests and sharing their products and activities with others concerned with transition.

AMNOTATED BIBLIOGRAPHY ON TRANSITION

Regional Rehabilitation Exchange (1987).

<u>Catalog of exemplary rehabilitation programs and practices.</u>
Austin, TX: Southwest Educational Development Laboratory.

model programs / vocational rehabilitation / Regional Rehabilitation Exchange

The Regional Rehabilitation Exchange surveys the rehabilitation community for programs and practices which can document especially effective approaches to rehabilitation service delivery and which can serve as models for other rehabilitation practitioners and administrators. In this catalog exemplary programs are classified by scope: (a) job placement/job development, (b) short-term transitional programs, (c) transitional programs with ongoing services, (d) supportive services for post-secondary disabled students, (e) high technology applications, (f) adult learning disabled programs, and (g) independent living service programs. Contact persons, client profiles, program objectives, outcomes, costs, etc. are provided in each program/practice description.

2. Wuerch, Bonnie Biel; & Voeltz, Luanna M. (1982).

Longitudinal leisure skills for severely handicapped learners: the Ho'onanea curriculum component. Baltimore, MD: Paul H. Brookes Publishing Company.

Ho'onanea curriculum / leisure skills / community integration

Three factors make longitudinal leisure skills relevant for wide dissemination and use. First, there have been increasing efforts to place severely handicapped students in least restrictive environments. Second, this curriculum emphasizes the necessity to provide direct training of leisure activities and skills in order to promote community integration. Finally, the curriculum recognizes the importance of the home environment in the development and maintenance of leisure skills. This program includes parents in all aspects of the planning and implementation of leisure activities training. The Ho'onanea project developed and validated the curriculum component described in this manual through instructional activities with severely handicapped students ranging primarily from 12 to 20 years of age. The curriculum component has been designed to meet particular leisure education needs of severely handicapped individuals related to community adjustment in a variety of environments. It is not intended to

address the full spectrum of leisure/recreation environments that should be systematically programmed. The activities that are included in this curriculum are primarily indoor, individual, and dyadic and do not involve activities that are oriented toward physical activity.

<u>Simulation training: An instructional approach to transition: A select annotated bibliography</u>. Eugene, OR: Rehabilitation Research and Training Center in Mental Retardation, University of Oregon.

literature review / simulation training / independent living

This bibliography provides comprehensive coverage of the literature (73 references) on simulation training and the handicapped. Author and subject indexes provide access to these annotated references.

4. AVA; SND; & NAVESNP (1987).

<u>Vocational special needs teacher education directory</u>. Author.

vocational education special needs personnel / directories

This directory of vocational special needs personnel is organized by state and gives contact information as well as instructional and research responsibilities of the position. Indexes by state and name provide easy access to this directory.

5. Louis Harris & Associates, Inc. (n.d.).

Executive summary: The ICD Survey II: Employing disabled Americans: A nationwide survey of 920 employers. New York: Author.

attitudes / employer involvement / barriers / employment outcomes

This executive summary provides an overview of survey findings of 920 employers of the disabled. Many findings described in the chapters of the report do not appear in this summary. Readers are urged to read the chapters in order to understand the full findings of the survey.

6. Louis Harris & Associates, Inc. (1986).

Executive summary. The ICD survey of disabled Americans. Bringing disabled Americans into the mainstream. A nationwide survey of 1.000 disabled people. New York: Author.

attitudes / barriers / employment outcomes

This executive summary provides an overview of the results of a survey of 1,000 disabled Americans. Many findings described in the body of the report do not appear in this summary. Readers are urged to examine the body of the report to understand the full findings of this survey.

7. Wircenski, Jerry L.; Passmore, David Lynn; Emshoff, Borden; Ay, Unal; & Kulachi, Mehmet (1981).

Handbook for the implementation of school-to-work transition skills for disadvantaged youth. University Park, PA: Division of Occupational and Vocational Studies. The Pennsylvania State University.

vocational training / transition / literature review / disadvantaged youth

This <u>Handbook</u> will be of assistance to vocational educators in the selection of applicable transition skills, the procurement of resource materials, the identification of exemplary programs, and the identification of key personnel and officers at the federal and state levels, in research and in professional organizations. The <u>Handbook</u> consists of five major sections: (a) a listing of school-to-work transition skills for disadvantaged youth, (b) sources of information pertaining to exemplary programs for disadvantaged youth; (c) resource materials applicable to the delivery of the skills, (d) a listing of general information sources, and (e) a bibliograpny of references used in the construction of the handbook.

Glen L. (n.d.).

Reasons for job loss: A review of employment termination studies of mentally retarded workers. (Manuscript submitted for publication.) Logan, UT: Department of Special Education. Utah State University.

vocational training / job retention / transition

This article reviews studies over a 35-year period that have examined job loss in mentally retarded workers. First, reasons for job loss that relate to workers' vocational competence were separated from other reasons for job loss, such as economic and family factors. Then, reasons relating to vocational competence were classified into four categories: job responsibility, task-production skills, task-related social skills, and personal-social skills. Reasons for job loss among mentally retarded workers are broadly distributed across both social and nonsocial domains, including job responsibility factors such as attendance and punctuality, task production factors such as inadequate quality and rate of work, task-related social skill deficits such as not following instructions and responding inappropriately to criticism, and personal-social inadequacies such as inappropriate dress, bizarre and aggressive bahavior, and inadequate or offensive verbal repertoires. The results of the review are discussed in relation to training issues for job retention of mentally retarded workers.

9. Fisher, Adrian T.; & Harnisch, Delwyn L. (1987, April).

<u>Career aspiration models of adolescents and young adults: A comparison of handicapped and nonhandicapped students</u>. (Paper presented at the annual meeting of the American Educational Research Association, Washington, DC.)

transition / employment outcomes / career guidance / High School and Beyond: A national longitudinal study for the 1980's

The analyses of the career aspiration models of the youth in the High-School and Beyond study have provided a picture of some unexpected consistency among their career aspirations and the relative importance of the factors in the discriminant analyses. The authors consider the significance of these findings and propose that there may be a serious need to reevaluate the place of the handicapped in the educational system and the impact the system has on their development and growth.

10. Hooley, Michael (1987).

Transition from school to work and adult life: A guide for planners. Mountain Plains Regional Resource Center: Des Moines, IA: Drake University, and Logan, UT: Utah State University.

transition / program development / curriculum

The purpose of this document is to provide a framework necessary to plan transition programs. The intended audience is special

education, vocational rehabilitation, vocational education, and human services personnel, parents, and advocates who plan transition programs. The focus of this document is planning activities that enhance transition services for youth and admits with disabilities.

11.
Rusch, Frank R.; Schutz, Richard P; Trach, John S.; Winking, Debbie; Tines, Jeffrey; & Heal, Laird (1987).

<u>Supported employment in Illinois: Model programs.</u> Champaign, IL: OCDSP/Transition Institute.

model programs / Illinois / supported work

This document serves two purposes in that it is not only a directory of supported employment model programs in Illinois, but also a definitive statement of supported employment, its costs, its successes.

12. Grace, Sarah; & Culpepper, Maribeth (n.d.).

Death and dying: A group experience with MR/DD adults. Los Alamos, NM: Las Cumbres Learning Services, Inc. (Comp. No. 84.158A - OSERS File No. 28)

death and dying / curriculum

Nine MR/DD adult group home clients and two facilitators participated in an eight-session, weekly group on death and dying. All participants had experienced loss, some of it recent. The need to demystify death and to talk about it in a safe setting was evident, and the group was undertaken as an ongoing commitment by Las Cumbres Learning Services to encourage clients to live their lives as normally as possible.

13. Grace, Sarah; & Culpepper, Maribeth (1983).

Sexuality curricula. Los ^lamos, NM: Las Cumbres Learning Services, Inc. (Comp. No. 84.158A - OSERS File No. 28)

sexuality / curriculum

This packet provides a comprehensive curriculum for organizing study and discussion of sexuality regarding the handicapped.

14.
Tompkins-McGill, Patricia; Rush, Mary; Wiley, Michael; Garcia, Ron; Culpepper, Maribeth; Kihnel, Larry; & Grace, Sarah (1985).

Handbook for adult clients. Los Alamos, NM: Las Cumbres Learning Services, Inc. (Comp. No. 84.158A - OSERS File No. 28)

advocacy / independent living / vocational training

This manual was developed to introduce the new adult client to the Las Cumbres Learning Services, Inc. programs. It describes the adult services provided: (a) work-related day programs, (b) outreach program, and (c) Los Alamos Group Home. Also discussed are clients' rights and responsibilities, and family involvement in program planning.

15.
Grace, Sarah; & Culpepper, Maribeth (n.d.).

You and your disability. Los Alamos, NM: Las Cumbres Learning Services, Inc. (Comp. No. 84.158A - OSERS File No. 28)

advocacy / civil rights

This curriculum consists of four formalized sessions, plus a booklet entitled "Client Rights Handbook." It is suggested that both the curriculum and the book be used consecutively. Though the curriculum is arranged in a set number of sessions, it may be necessary to continue one topic for a number of sessions until it is completed.

16. Las Cumbres Learning Services, Inc. (n.d.).

Employment of the handicapped through community involvement.

Los Alamos, NM: Author. (Comp. No. 84.158A - OSERS File No. 28)

community integration / transition / job placement

This manual introduces Phase II of Las Cumbres Learning Services "On-the-job-training (OJT)" programs. The long range plan of these programs is to have these trainees become regular employees in the community.

17. Mulcahey, Mary Ann; & Warren, Steven F. (1984, May).

The aging parent with a home-living handicapped dependent: Issues and legal planning. Paper presented at the American Association on Mental Deficiency Conference.

estate planning / aging parents

The purpose of this study was to investigate whether aging parents are making estate and/or guardianship arrangements as part of their plans for the future of their handicapped adult children. This paper addresses three questions:

What legal arrangements are parents making for severely and

moderately retarded adult dependents?

2) How do aging parents who make legal arrangements differ from their peers who do not?

3) What are some problems being encountered by parents as they attempt to make appropriate legal arrangements for the future?

18. Chadsey-Rusch, Janis; & Gonzelez, Patricia (1986).

Social ecology of the workplace: Observer's manual. [DRAFT] Champaign, IL: University of Illinois. Secondary Transition Intervention Effectiveness Institute.

social skills / work environment

This manual guides the observer in recording social interaction behaviors of a designated subject.

19. Donder, Daniel J. (n.d.).

Follow-up of TMH program graduates as a basis for planning future educational services. Unpublished manuscript. University of Illinois at Urbana-Champaign.

follow-up studies / Illinois / trainable mentally retarded

The current study provides information on the post-school functioning of graduates of the Trainable Mentally Handicapped Program of the Champaign Community Schools. The information obtained was used as a basis for developing a community-based curriculum for moderately handicapped elementary and secondary students. Specifically, the study provided information reflecting the quality of domestic (living), vocational, recreation/leisure, and community integration skills of the graduates. In addition, information was obtained from the parents of graduates on their perception of the educational program. The results gathered provided educators with information about how the current curriculum prepared their graduates for post-school life. In particular, the results illustrated the curriculum strengths, areas which needed more emphasis, and areas which needed to be minimized if their future graduates are to function as independently and productively as possible in natural domestic, community, recreation/leisure, and vocational adult environments.

20. Gold. Marc (1974).

Train, don't test. Champaign, IL: Children's Research Center.

vocational training / vocational evaluation

This paper presents Gold's ideas on training and evaluation of the mentally handicapped.

21. Hanley-Maxwell, Cheryl; Rusch, Frank R.; & Rappaport, Julian (1986).

A multi-level perspective on job terminations for adults with handicaps. Champaign, IL: Secondary Transition Intervention Effectiveness Institute.

job retention / attitudes / employer involvement

This paper introduces a multi-level analysis approach examining factors related to job terminations of workers with handicaps. One of the major cutcomes of this analysis is the recognition that existing, published reports have almost exclusively focused upon changing the bahavior of the employee with handicaps. Our viewpoint suggests broader consideration be given to planned interventions at several levels of analysis. Four levels were examined including individual, small group, reganizational or systems-centered, and institutional and community. Interventions were reviewed and proposals for new interventions were made at each level. In general, interventions occur within the first three levels of analysis. The fourth level (institutional and community) remains The Mayely untapped by social change advocates.

22. Czajka, John L. (1984).

Digest of data on persons with disabilities. Washington, DC: Mathematica Policy Research, Inc.

data analysis / demographics

This <u>Digest of Data on Persons with Disabilities</u> is intended to bring together a variety of data on the disabled population and provide guidance in the use of those data. The contents and structure of the <u>Digest</u> reflect several objectives:

1) to acquaint the reader with the major sources of data on the

disabled population in the United States;

to provide an overview of what is known about the size and 2) characteristics of the disabled population;

3) to provide guidance in interpreting statistics on the disabled population:

4) to increase the reader's appreciation of both the strengths and limitations of individual sources of data on disabled persons:

5) to identify significant gaps in the data on disabled persons;

6) to introduce important concepts used in the discussion of disability; and

7) to increase awareness of the complexity of disability as a phenomenon by presenting statistics that reflect different perspectives.

The topical organization, the selection of sources and specific tables, the highlights and explanatory notes that accompany each table, and the supplementary information presented in the appendixes were all designed with an eye to these multiple objectives.

23. Chase, Shirley A.; Izzo, Margo V.; & Dunfee, Matthew (1987).

A study of the vocational assessment process as applied to vocational education: Final report. Columbus, OH: The National Center for Research in Vocational Education. The Ohio State University. (Comp. No. 84.078C - OSERS File Nos. 107 and 128)

Ohio / vocational evaluation / vocational education / data analysis

The purpose of this project was to examine the vocational assessment processes in use in Ohio Vocational Assessment Centers to determine if current practices were meeting the intent of the Carl D. Perkins Vocational Educational Act. A survey instrument was mailed to each of the 77 vocational evaluators in Ohio. Sixty-five percent of the completed surveys were returned. Analysis of data is presented.

24. Berkowitz, Monroe; & Hill, M. Anne (Eds.) (1986).

<u>Disability and the labor market: Economic problems, policies, and programs</u>. Ithaca, NY: ILR Press.

disincentives to work / Social Security benefits / economics of disability

This volume contains papers presented at a meeting on the economics of disabilities held in Washington, DC, April 9-10, 1985. This meeting covered a broad range of issues such as control of health care costs, economics of mental retardation,

long-term care, and mental illness. This book contains only the papers concerned with the economic analysis of disability and the labor market.

25. Peterson, Michael (1986).

<u>Vocational assessment of special students: A procedural manual.</u>
Starksville, MS: Voc-Aim.

vocational evaluation / special education / vocational education / program development

This monograph is concerned with the effective design and implementation of a vocational assessment program in the education of special students. The following six guidelines summarize the key principles discussed:

trained personnel are the key to effective vocational assessment:

2) develop and use locally developed work samples;

3) obtain access to a vocational evaluation center;

4) plan to develop and expand vocational assessment in phases with a team of personnel;

5) be sure vocational assessment is instructionally relevant and useful; and

6) insure that vocational assessment provides vocational guidance and identification of any appropriate career and vocational services.

Appendixes provide references and information regarding interest inventories, aptitude tests, and work sample systems.

26. Peterson, Michael (1986).

<u>Vocational assessment for vocational education: Competency analysis and work sample development</u>. Starksville, MS: Voc-Aim.

vocational evaluation / vocational education / work samples

It is the intent of this manual (a) to provide guidelines to develop an exemplary procedure for competency-based vocational assessment and (b) to provide ideas for using performance samples that are both direct enough to be easily used and yet take into account complex assessment issues. It is directed toward vocational evaluators, vocational educators, special educators, and others who are involved in providing vocational assessment for vocational education of students with special needs. References and appendixes with forms are included.

27. Peterson, Michael (1985).

<u>Vocational assessment of special students: A guide</u>. Starksville, MS: Voc-Aim.

vocational evaluation / special education / program development

This monograph provides a model for the implementation of vocational assessment of special needs students in public school settings. This guide is intended for vocational educators, vocational special needs personnel, special educators, rehabilitation personnel, and state department of educational officials in conceptualizing and implementing vocational assessment in their states and schools.

28. Peterson, Michael (n.d.).

<u>Grant writing for human services: A training manual</u>. Starksville, MS: Voc-Aim.

grant writing / human services

This training manual and the seminar in which it is used are intended to help develop skills in grant development, writing, and funding.

29. Gajar, Anna H. (1986).

Assisting the learning disabled: A program development and service delivery guide for university service providers, diagnosticians, tutors, counselors, and learning disabled students. University Park, PA: The Pennsylvania State University.

program development / learning disabilities / post-secondary
education

Components of the manual were developed for the purpose of facilitating the initiation of service delivery programs for LD students in the university mainstream, rather than in a separate individualized curriculum or in a remedial or developmental year format. For easy reference, narrative sections are minimized. Although the content of the guide is primarily intended for university level service providers, diagnosticians, tutors, and counselors, sections have been included keeping in mind the needs of partits and LD students. In addition, the research section may be of particular interest to university faculties from various disciplines.

30. Cook, Judith A.; & Roussel, Amy E. (1987).

Who works and what works: Effects of race. class, age and gender on employment among the psychiatrically disabled. Paper presented at the meeting of the American Sociological Association, Chicago, Illinois. (Comp. No. 84.023G - OSERS File No. 55)

demographics / psychiatrically disabled / vocational
rehabilitation

This monograph presents literature (a) documenting the relationship between demographic features and employment, (b) describing techniques of vocational rehabilitation for the mentally ill, and (c) examining those few studies which have directly explored the impact of demographic features on vocational outcomes among the population. References and tables are included.

31. Ratzlaff, Leslie A. (Ed.) (1987).

The education evaluator's workbook: How to assess education programs (Vols. 1-3). Alexandria, VA: Education Research Group.

program evaluation / program development

This three-volume set is a compilation of ideas and methods which have been used successfully in evaluating education programs. Each volume is in workbook format with lessons providing blank forms which can be used and torn out. Some of the "how-to" topics that are covered are: evaluation standards and designs, data analysis, evaluation report writing, needs assessment, achievement test design, interviews, questionnaires, and teaching performance.

32. Fuhrer, Marcus J. (1987).

Rehabilitation outcomes: Analysis and measurement. Baltimore, MD: Paul H. Brookes Publishing Co.

follow-up studies / independent living / vocational rehabilitation / human services / data analysis

This volume encompasses outcome analysis in the areas of medical rehabilitation, vocational rehabilitation, psychiatric rehabilitation, the habilitation of persons with mental retardation, and independent living services. Its design reflects the conviction that there is a common core of values, attitudes, concepts, and practices that run throughout the different service

areas of rehabilitation. The goal of this book is to promote the application of the principles and practices of outcome analysis to assessing the impact of rehabilitation services. References and an index are included.

3.
Surrett, Judith Y.; & Esposito, Louis G. (1987).

Project Employ: A multidisciplinary approach utilizing rehabilitation engineering to affect employment for persons with severe developmental disabilities: A handbook. New Haven, CT: The New England Association of Business, Industry and Rehabilitation, Inc.

rehabilitation engineering / model programs / Connecticut / vocational rehabilitation

This handbook is intended to provide information regarding a process designed and demonstrated in "Project Employ," which has proven successful in supporting institutional change affecting employment for persons with severe developmental disabilities. Its purpose is to be an instructive handbook for service providers who are working to support employment opportunities for individuals with disabilities. The handbook has three sections. The first section concentrates on the grant project, its design and activities. The second section focuses on a key service introduced by the project: technology applications provided through rehabilitation engineering. The third section provides concluding remarks which summarize the impact made by "Project Employ" and the needs identified throughout the process.

34. Stephens, Robin; & Haley, Pat (Eds.) (1987).

The empowerment dynamic: Planning and implementing a support group network. Portland, OR: The Employability Support Network of Disabled Youth. Oregon Health Sciences University. Child Development & Rehabilitation Center. (Comp. No. 84.023D - OSERS File No. 14)

Oregon / support groups / program development

This report is a replication handbook which explains how to plan and implement a support group for persons with special needs. Its contents are based on the experiences gained by the Employability Support Network in the State of Oregon of planning and implementing more than 30 support groups for disabled youth. This handbook is intended to be used by agencies and individuals who have an interest in utilizing support groups as a service modality for the

population with which they are concerned. The report describes rationale for the use of support groups as well as specific guidelines for their implementation.

35.
The University of the State of New York. The State Education Department Office for Education of Children with Handicapping Conditions. (1981).

A curriculum to foster understanding of people with disabilities: Staff orientation manual. Albany, NY: Author.

curriculum / attitudes

This staff orientation manual is designed to familiarize the teacher with an understanding of people with disabilities. It is an introduction to the curriculum materials for junior and senior high school levels designed to improve acceptance of children and youth with disabilities in a least restrictive environment.

36.
The University of the State of New York. The State Education Department Office for Education of Children with Handicapping Conditions. (1981).

A curriculum to foster understanding of people with disabilities: The handicapped in literature. Albany, NY: Author.

curriculum / attitudes

This guide was written to aid teachers of English literature in the junior and senior high schools in teaching about persons with disabilities.

37.
The University of the State of New York. The State Education Department Office for Education of Children with Handicapping Conditions. (1981).

A curriculum to foster understanding of people with disabilities: Science and health education perspectives on the handicapped. Albany, NY: Author.

curriculum / attitudes

This guide was designed to supplement, expand or enrich the existing curriculum in health education and science at the junior and senior high school levels. The focus of this expansion is the study of disabilities and people who have them.

38.

The University of the State of New York. The State Education Department Office for Education of Children with Handicapping Conditions. (1981).

A curriculum to foster understanding of people with disabilities: The handicapped in society. Albany, NY: Author.

curriculum / attitudes

The lesson plans provided in this guide are designed to help teachers of social studies at the junior and senior high school levels teach about the important changes that have taken place in American society in relation to handicapped persons.

Research in learning disabilities: Issues and future directions. Boston, MA: Little, Brown & Company.

learning disabilities / research synthesis

This book and the research symposium upon which it is based reflect the acceptance of the challenge to give direction to research in the field of LD. Each chapter focuses on one of six topical areas: (a) models and theories, (b) research, (c) eligibility, (d) assessment, (e) intervention, and (f) public policy. The final chapter synthesizes and builds upon the previous chapters to develop an agenda for future research. References and an index are included.

National Council for Therapy and Rehabilitation through Horticulture, Inc. (1986).

<u>Project Plantwork: A horticulture employment initiative for workers with developmental disabilities</u>. Gaithersburg, MD: Author.

horticulture / job placement / Projects with Industry (PWI) / program development

The purpose of this training manual is to detail the structure and procedures of Project Plantwork and to demonstrate the success of a PWI approach. Programmatic ideas for those interested in establishing horticultural job development programs or job development programs for persons with developmental disabilities in other industries are provided.

41. Schmitt, Elizabeth M.; Esposito, Sally; & Spence, Kathleen L. (1986).

Final performance report. Part II: Project summary. Planning and developing cooperative transitional services for the handicapped in Connecticut. Hartford, CT: State of Connecticut. Department of Education. (Comp. No. 84.158B - OSERS File No. 70)

model programs / Connecticut / final report

This summary report contains highlights of the accomplishments achieved over the past 2 years (1984-1986) as a result of the Connecticut cooperative transitional services planning project.

42. Gronberg, Gary W. (1987).

Final report for North Dakota Secondary Education and Transition Services for Handicapped Youth: A cooperative model for planning and developing transitional services. Bismarck, ND: State of North Dakota Department of Public Instruction. (Comp. No. 84.158B - OSERS File No. 75)

model programs / North Dakota / final report

This is the final report for North Dakota's 1984-1986 project, Secondary Education and Transition Services for Handicapped Youth. Extensive appendixes are included.

43. Arnold, Mitylene (1986).

<u>Final report</u>. <u>Interagency guidelines for transition</u>. Athens, GA: University Affiliated Program. University of Georgia. (Comp. No. 84.158B - OSERS File No. 74)

model programs / Georgia / final report

This is the final report for a project whose original purpose was to develop, disseminate, and implement a cooperative model for activities among state and local education and adult service agencies in order to facilitate effective planning to meet the service employment needs of handicapped youth as they left school.

44. Mesta, Josephine G. (1987).

Secondary education and transitional services for handicapped youth planning project: Two year planning report. Saipan, CM: Commonwealth of the Northern Mariana Islands. Office of the Superintendent. Department of Education. (Comp. No. 84.158B - OSERS File No. 78)

final report / model programs / Northern Mariana Islands

This two-year planning project report is actually the final report of a project that was concerned with developing Secondary Transitional Service Systems for transitional youths, with a focus on interagency and community involvement.

45. Galloway, James R. (1986).

National Transition Program Support System. Final report. Washington, DC: National Association of State Directors of Special Education. (Comp. No. 84.158B - OSERS File No. 73)

final report / model programs / National Association of State Directors of Special Education

This final report is a summary of activities conducted and products developed and disseminated during 1984-1986 for the National Transition Program Support System.

46. Alexander, Charles; & Olson, Ted (1987).

Project RETAIL (Reaching employment through applied individual learning). Final report. Tacoma, WA: Clover Park Schools. (Comp. No. 84.158B - OSERS File No. 77)

final report / model programs / Washington

This is the final performance report of Project RETAIL, Clover Park High School, Tacoma, Washington, the goal of which was to promote the successful transition of handicapped students from school to the workplace. The project is described, as well as curriculum, training and evaluation, and outcomes.

47. Bradford, Charles (1986).

<u>Final report</u>. <u>Transitional services for handicapped youth</u>. Washington, DC: International Association of Machinists and Aerospace Workers. (Comp. No. 84.158B - OSERS File No. 72)

final report / Washington / idel programs

This is the final report of the International Association of Machinists and Aerospace Workers' two-year demonstration project. The purpose of the project was to design and establish in Seattle a program to help handicapped youth accomplish the difficult transition from the classroom to career oriented employment, test and validate effective approaches, and demonstrate their applications. Accomplishments, setbacks, conclusions, and recommendations are discussed.

48. Bennett, Barbara (1987).

Transition project update. Wilmington, DE: Delaware Division of Vocational Rehabilitation. (Comp. No. 84.158B - OSERS File No. 71)

model programs / Delaware / project update

This is an update on Delaware's transition project, the purpose of which is to facilitate movement of children and youth with disabilities during periods of transition.

49. Murphy, Thomas (1986).

<u>Final evaluation report.</u> <u>Transition Project.</u> <u>December 1986.</u> Santa Barbara, CA: Santa Barbara High School District. (Comp. No. 84.158B - OSERS File No. 69)

final report / mode¹ programs / California

This final report of Santa Barbara High School District's transition project includes: (a) final evaluation report, (b) financial status report, (c) employability curriculum, (d) job coach training manual, (e) parent guidelines, and (f) interagency agreements.

50. Dunnam, Trudy (1986).

<u>Learning Disabled College Writers Project</u>. <u>Evaluation report</u> <u>1985-1986</u>. Minneapolis, MN: General College Office of Research and Evaluation. University of Minnesota.

learning disabilities / post-secondary education / curriculum

The Learning Disabled College Writers Project was developed to aid learning disabled college students master composition skills through development of skill in the use of microcomputer word processors. The intervention included initial training on the microcomputer, two terms of freshman composition coursework with microcomputer support, and a career exploration component.

51. Chelimsk Eleanor (1987).

Retrospective and prospective analysis: Linking program evaluation and forecasting. <u>Evaluation Review</u>, <u>11</u>(3), 355-370.

program evaluation / forecasting

This article raises some questions about the relationship between program evaluation and forecasting. Contrasting the two fields in terms of mind-set, purpose, problems, advantages, and use shows that although their modes of inquiry are indeed very different in many ways, there is also interdependence between the two in several areas. It is argued that each can be greatly strengthened by better understanding and use of the other's techniques.

52. Rusch, Frank R. (1987).

<u>Second annual report.</u> <u>1987</u>. <u>Secondary Transition Intervention Effectiveness Institute</u>. Champaign, IL: Secondary Transition Intervention Effectiveness Institute.

annual repart / Secondary Transition Intervention Effectiveness Institute

This second annual report of the Transition Institute at Illinois updates and summarizes the progress of the various ongoing research programs of the Institute.

- 4) list of consultants on integrated school programs.

60. VanBiervliet, Alan; & Sheldon-Wildgen, Jan (1981).

<u>Liability issues in community-based programs: Legal principles.</u>
<u>problem areas. and recommendations.</u>
Baltimore, MD: Paul H.
Brookes Publishing Co.

community integration / program development / liability issues /
legal rights

This book is a guide to legal liability issues facing persons who are developing, operating, or monitoring community-based residential or day training agencies that serve physically or mentally impaired persons, or juveniles. This book provides a practical approach to the legal principles surrounding negligence and other liability issues as they apply to community-based service agencies. In addition, this book provides recommendations for helping persons in community-based agencies conduct their operations in ways that will help them minimize injuries, avoid destructive lawsuits, and conduct positive programs that enable the clients to cope with personal and environmental demands. By conducting community agencies in this way, pitfalls that might otherwise occur may be avoided.

61. Novak, Angela R.; & Heal, Laird W. (1980).

Integration of developmentally disabled individuals into the community. Baltimore, MD: Paul H. Brookes Publishing Co.

community integration / normalization / deinstitutionalization

This book provides a detailed compilation of research findings on a wide spectrum of subjects related to the integration of mentally retarded and other developmentally disabled people into the community. The authors have presented a wealth of data and systematically interpreted their significance regarding current ideologies and controversial issues. They have also attempted to assess the limitations of the evidence and identify important unanswered questions. Recommendations for further studies are included.

62. Luftig, Richard L. (1987).

<u>Teaching the mentally retarded student: Curriculum, methods, and strategies</u>. Boston, MA: Allyn & Bacon, Inc.

curriculum / special education

63. Lee, Marjorie; & Tenpas, Steven (1987).

<u>Parent-professional teamwork</u>. <u>Employment project for persons with disabilities</u>. Glen Ellyn, IL: Special Education Parents Alliance.

Special Education Parents Alliance / parent involvement / model programs / Illinois

This booklet describes the history and philosophy of the Special Education Parents Alliance's employment project for disabled adults. Techniques for job search, job placement, and job coaching are explained.

64. McLoughlin, Caven S.; Garner, J. Bradley; & Callahan, Michael J. (Eds.) (1987).

<u>Getting employed, staying employed: Job development and training for persons with severe handicaps</u>. Baltimore, MD: Paul H. Brookes Publishing Co.

job placement / task analysis / personnel preparation / vocational training

This manual is concerned with the employment process and provides guidance in the job development, placement, and training of persons with severe handicaps. With the authors' step-by-step guidelines that encourage readers to adapt strategies to their own services, job developers and trainers master the skills needed:

(a) to identify job loads, (b) to research prospects, (c) to project a businesslike image, (d) to prepare a job evaluation, (e) to match employees with jobs, and (f) to increase production. Appendixes are provided which include sample forms and procedures.

65. Willingham, Warren W. (1987).

Handicapped applicants to college: An analysis of admissions decisions (College Board Report No. 87-1. ETSRR No. 87-1). New York: College Entrance Examination Board.

post-secondary education / data analysis / admissions studies

The purpose of this study was to compare admissions decisions of handicapped and nonhandicapped applicants who have comparable SAT scores and high school grades. The main finding was that handicapped applicants were admitted on much the same basis as nonhandicapped applicants, but there were exceptions that favored hearing impaired applicants, disfavored small groups of visually impaired and physically handicapped applicants to small institutions, and disfavored learning disabled applicants to a small degree. The results appeared inconsistent with the assumption that colleges give special attention to flagged test scores of handicapped applicants.

66.
National Council on the Handicapped (1986).

Toward independence: An assessment of federal laws and programs affecting persons with disabilities - with legislative recommendations. Washington, DC: U.S. Government Printing Office.

federal legislation / human services / community integration

In this report, the Council presents its findings, conclusions, and legislative recommendations based upon its review and assessment of Federal laws and programs. The report includes a list of major Federal programs serving individuals with disabilities, ranked according to expenditures, with an estimated number of persons with disabilities served. This report proposed some fiscally responsible approaches for spending disability-related dollars more prudently and productively. The Council is strongly convinced that present and future costs of disability to

the Nation are directly related to the degree of success attained in reducing existing barriers, both structural and attitudinal, and in providing appropriate services to individuals with disabilities so that they may realize their full potential and become more independent and self-sufficient. The Council has focused in detail upon ten major topic areas of particular importance to individuals with disabilities. These topics are discussed extensively in individual topic papers presented in the separate Appendix to this report. The Council's legislative recommendations in regard to the 10 issue areas are summarized in the body of the report.

67. Stearns, Marian S.; Fairweather, James S.; & Wagner, Mary M. (1984).

A proposal for research: Longitudinal study of a sample of handicapped students. <u>Technical proposal</u>. Menlo Park, CA: SRI International.

follow-up studies / program development / transition

SRI International, with Policy Studies Associates (PSA), proposes to develop a design for longitudinal study of handicapped youth. Study questions of paramount concern are: (1) What paths do youths with various handicapping conditions take in secondary school and for the first five years after high school? (2) What is it about handicapped youth, their families, and their educational and other services and experiences during secondary school and afterwards that makes for success in education, employment, and independent living? (3) What roles do programs and actions under the influence of The Education of the Handicapped Act play in promoting achievement in education, employment, and independent living?

In this design and planning project, the authors will first prepare a conceptual framework and alternative study designs to enable the Office of Special Education Programs (OSEP) to make an informed selection. Based on the selected design, they will develop and implement plans for sampling, develop data collection plans and instruments, develop analysis and reporting plans, and then test the feasibility of the field procedures. Reports will be prepared to guide OSEP in preparing specifications for, and to guide the conduct of, the subsequent longitudinal study.

New perspectives on Down Syndrome. Baltimore, MD: Paul H. Brookes Publishing Co.

Down Syndrome / social skills / community integration / vocational rehabilitation

The material contained in this book represents major topical presentations plus allied comments from peer reviewers at the Down Syndrome State-of-the-Art Conference (April 23-25, 1985, Parker House Hotel, Boston, MA). The format of the program was created to ensure that all disciplines presented would leave the conference with a more accurate, well-rounded perception of Down syndrome and the people affected by it. Information and research findings from biomedical, educational, psychosocial, and community living perspectives were presented. Recommendations for further research accompanied the presentations of life span issues surrounding Down syndrome.

79. Castellani, Paul J. (1987).

The political economy of developmental disabilities. Baltimore, MD: Paul H. Brookes Publishing Co.

human services / policy research / program development

This book describes the growth and changing structure of state and local services for persons with developmental disabilities in terms of the political, economic, and social faces that shape them. The purpose of this text is three-fold: (a) to identify the central issues and problems in a new system of community-based developmental services, (b) to analyze the factors that affect the amounts of services that are available and the ways in which they are delivered, and (c) to examine those issues and problems in a political economy framework that shows the relationships among them

and organizes them in a manner that enhances one's ability to resolve the emerging problems in this new policy area. References and an index are included.

80. DeStefano, Lizanne; Linn, Robert; & Markward, Martha (1987).

Review of student assessment instruments and practices in use in secondary/transition projects. Revised. Champaign, IL: Secondary Transition Intervention Effectiveness Institute. (Sponsoring Agency: U.S. Department of Education, Office of Special Education and Rehabilitative Services (OSERS), Office of Special Education Programs, Waskington, DC)

model programs / OSERS / student assessment / Secondary Transition Intervention Effectiveness Institute

The purpose of this research study was to determine the current status of instrumentation and practices of student assessment in programs dealing with the transition of special education students from school to work or post-secondary education and to determine areas where current practice was not able to meet the changing demands of transitional services. The authors concluded that the OSERS-funded secondary transition projects made use of a wide variety of student assessment devices for each of the following purposes: initial assessment for placement, assessment for program planning, ongoing assessment/monitoring student progress, and evaluation of program outcome measures. Although several projects are engaged in local instrument development, the majority of projects are using standardized instrumentation. The appendixes include a model programs survey, a review of commercially available assessment instruments, and a bibliography.

81. Dowling, Jane; & Hartwell, Cindy (1987).

Compendium of project profiles 1987. Champaign, IL: Secondary Transition Intervention Effectiveness Institute. (Sponsoring Agency: U.S. Department of Education, Office of Special Education and Rehabilitative Services (OSERS), Office of Special Education Programs, Washington, DC)

model programs / Secondary Transition Intervention Effectiveness Institute

This document, produced by the Technical Assistance Program at the Transition Institute at Illinois, is a directory of grants funded under the OSERS Secondary Education and Transitional Services for Handicapped Youth initiative. One of the major activities within the Institute is to collect, summarize, and disseminate information

about the model programs funded under the federal initiative. The dissemination of the descriptive data through the Compendium is intended to facilitate efforts to assure the long-range impact of the initiative upon both school and community-based programs.

82. Leach, Lynda N.; & Harmon, Adrienne S. (1987).

Annotated bibliography on transition from school to work (Vol. 2). Champaign, IL: Secondary Transition Intervention Effectiveness Institute. (Sponsoring Agency: U.S. Department of Education, Office of Special Education and Rehabilitative Services (OSERS), Office of Special Education Programs, Washington, DC)

transition / literature review / Secondary Transition Intervention Effectiveness Institute

Volume 2 of the Annotated Bibliography on Transition from School to Work continues the review of the literature pertaining to evaluation methodology, the efficacy of secondary and transitional services, and related topics that was begun in Volume 1. Coverage is not comprehansive, but rather representative of what has preceded current transition efforts, what is going on now, and what is recommended for future analysis and study. Volume 2 does not duplicate Volume 1; therefore using both volumes will provide a more accurate review or the transition literature. As with Volume 1, the intent of Volume 2 is (a) to assist professionals in locating relevant resource materials on transition and evaluation, and (b) to facilitate communication and information sharing among professionals of all disciplines involved in transition.

85. Rist, Ray C. (Ed.) (1986).

<u>Finding work: Cross national perspectives on employment and training</u>. London: The Falmer Press.

job creation / unemployment / industrialized nations

This book addresses a central problem facing industrial societies -- how to make sure that all those who want to work will be able to do so. There are at present millions of persons who are unemployed and who want to work. But the current policies, programs, and approaches to generating work have not been sufficient to do all that needs to be done. By providing studies from the United Kingdom and Western Europe, from North America, Japan, Australia and from China, there is presented in this book a comprehensive assessment of job creation strategies and how it is that employment and training efforts fit into this overall scheme. The papers are written by a set of internationally recognized scholars. The issues addressed on displaced workers, on what to do for youth, on how to develop apprenticeship programs, and what are the payoffs from the investment in worker education are but some of the critical topics addressed in this volume. This book represents an attempt at policy assessment on what is emerging as an international crisis of the industrial countries.

86. Burke. Gerald; & Rumberger, Russell W. (Eds.) (1987).

The future impact of technology on work and education. London: The Falmer Press.

technology / employment patterns

One of the major issues facing nations around the world concerns the development, use, and impact of new technologies. Over the last two decades technological developments in a number of scientific fields have produced a wide variety of new products and processes that are literally transforming contemporary society. They include computers, communication systems, automatic teller machines, industrial robots, automated manufacturing systems, and

synthetic drugs. The pace of new developments in these fields is producing a continual progression of faster, smaller, and cheaper products. Perhaps the single most important recent development is the personal or microcomputer, a device that is altering our lives at home as well as at work, in the office as well as on the factory floor. The advent of new technologies and the products they have spawned have raised a wide range of ec omic and education policy questions. The chapters in this volume explore a wide range of important issues about the impact of technology on work and elucation. They succeed in pointing out the complexity of the issues and the difficulty in reaching definitive conclusions about what a technological future will look like. They also provide important information that must be considered in any public debate about technology if that debate is going to help shape a desirable future that necessarily will be shaped by the powerful force of technology.

87. Chapple, Eliot D. (1979).

Rehabilitation: Dynamic of change. An anthropological view. Huntington, NY: Robert E. Krieger Publishing Company.

rehabilitation / anthropology

This book is a partial statement of points of view expressed by participants in a conference on the potential contributions of anthropologists to rehabilitation. The author's purpose is to enable those in rehabilitation to see what anthropologists can contribute to their under anding. He emphasizes the need to differentiate inferences that are projections of our own biases, values, and experience from those which are appropriate for the client. He believes that anthropological methods and approaches, the emphasis on direct observation and objectivity toward what one sees, are of value in dealing with client problems. With an anthropological perspective, the author discusses various concepts important to rehabilitation: individuality, criteria for defining the handicapped and the disadvantaged, work, institutions and rehabilitation, evaluation, and others. A bibliography is included.

Final report: Handicapped Children's Model Demonstration
Projects: A program for youth employment in rural and sparsely
populated areas. Moscow ID. University of Idaho. Special
Education Department. Secondary Transition & Employment Project
(STEP). (Comp. No. 84.023D - OSERS File No. 9)

rural areas / Idaho / final report / curriculum / Project STEP

The Secondary Transition and Employment Project (STEP) addresses the need for secondary/vocational curricula for students with handicaps in the rural and sparsely populated state of Idaho. The goals and objectives for this project include the development and implementation of curricula for school-based instruction which will prepare students in the vocational domain and allow them to meet state graduation requirements, curricular strategies for on-the-job vocational training and social skills instruction, staffing strategies which will enhance the school and non-school vocational and job related training of students, and planned transition strategies from school to competitive work on supported employment within a community-based program.

89. Baumgart, Diane; & Perino, Daniel M. (n.d.).

<u>Mocational assessment in the school setting: A curriculum based model</u>. Moscow, ID: University of Idaho. Special Education Department. Secondary Transition & Employment Project (STEP). (Comp. No. 84.023D - OSERS File No. 9)

curriculum / vocational evaluation / rural areas / Idaho / Project STEP

Devising and implementing a secondary/vocational training curriculum for students with handicaps has emerged as a major goal of the 1980s. The purpose of a vocational curriculum is to prepare students for employment, foster transition from school to work, and ensure that academic skills learned enhance nonschool performance. This manual describes a rationale and model for implementing secondary/vocational assessment that is integrated with curriculum and transition strategies. The assessment and curricular strategies described are for students in rural and sparsely populated areas and can be implemented at both the junior and senior high school levels. Assessment is integrated into each phase of the vocational curriculum and is explained in detail in the text and attached appendix.

Baumgart, Diane; & Anderson, Jane (n.d.).

Assessing & teaching job related social skills: A curriculum manual for students with mild handicaps. Moscow, ID: University of Idaho. Special Education Department. Secondary Transition & Employment Project (STEP). (Comp. No. 84.023D - OSERS File No. 9)

social skills / curriculum / Idaho / rural areas / Project STEP

The focus of this manual is condeveloping and implementing intervention programs designed to enhance social competence through individual programming. Given the wide range of interpersonal skills which may be required of students with handicaps in work settings, effective programming requires:

 Identifying those skills which are considered important or socially useful by significant others;

 Clearly defining the cognitive and performance components of each skills;

3) Accurately assessing skill competence;

4) Developing intervention strategies which maximize skill generalization and maintenance.

This manual addresses each of these issues and presents strategies which have been field tested with secondary students with mild handicaps in a variety of school and community based vocational programs.

Stepping out: An overview of the STEP curriculum. Moscow, ID: University of Idaho. Special Education Department. Secondary Transition & Employment Project (STEP). (Comp. No. 84.023D - OSERS File No. 9)

curriculum / vocational training / secondary education / rural areas / Idaho / Project STEP

This manual presents criteria for determining the content of the vocational curriculum, describes best instructional practices, and outlines strategies for implementing a vocational curriculum for secondary students with handicaps. The four phases of the STEP model are outlined: career exploration, work exploration, career focus, and job preparation.

94. Baumgart, Diane; Purdy, Susan; & Anderson, Jane (n.d.).

Work exploration: A manual for initial on-site work instruction for students with mild. moderate or severe handicaps Moscow, ID: University of Idaho. Special Education Department. Secondary Transition & Employment Project (STEP). (Comp. No. 84.023D - OSERS File No. 9)

vocational training / rural areas / Idaho / Project STEP

Work exploration for students with mild. moderate and severe handicaps is designed to provide students with hands-on community work experience in order to determine vocational preferences and to provide instruction in work-related skills, functional academics and job-seeking skills. This manual contains goals, activities, and forms for placing all students with handicaps in an initial work experience based on identified skills and preferences.

Making transitions work: Short- and long-term transition strategies: A planning guide for junior and senior high school teachers. Moscow, ID: University of Idaho. Special Education Department. Secondary Transition & Employment Project (STEP). (Comp. No. 84.023D - OSERS File No. 9)

transition / secondary education / curriculum / Idaho / rural areas / Project STEP

A carefully planned transition process can help reduce the uncertainty and stress associated with leaving school. The following transition strategies approach transition as a process and as a product. The process is the exchange of information between parents, students, schools and postsecondary environments. The product is the student's integration into the community. This guide will address both short-term and long-term transition strategies. The format utilized includes goals, objectives, activities, materials, and person(s) responsible. Each strategy is accompanied by forms which have been used in the transition process by a variety of school districts.

Involving consumers in decision-making. <u>Social Policy</u>, <u>13(2)</u>, 36-41.

human services / program evaluation / Concerns Report Methods

This article addresses the problem of involving consumers in the decision-making process of basic institutions and making human services accountable to those they serve. The situation is even more acute for institutions serving the poor, the disadvantaged, and powerless. The purpose of this article is to describe the Concerns Report Method, a systematic, data-based process for identifying the strengths and problems of human-service institutions and communities -- and ways to improve them -- from the perspective of citizen-clients. Uses of this method to improve the communities it serves are described, as well as future implications.

Family life cycle: Theoretical and empirical implications and future directions for families with mentally retarded members. Lawrence, KS: The Research & Training Center on Independent Living, Bureau of Child Research, University of Kansas.

family involvement / family life cycle theory

There are three major purposes of this monograph. The first is to present a family systems conceptual framework within which life cycle concepts are linked to other dimensions of family dynamics. The second purpose is to review theoretical and empirical literature on the life cycle needs of families with mentally retarded members. The final purpose is to suggest future research, intervention, and policy directions aimed toward strengthening family adaptation over the full life cycle.

The training and generalization of social interaction during breaktime at two job sites in the natural environment. <u>Journal of the Association for Persons with Severe Handicaps</u>, <u>10(1)</u>, 41-50.

social skills / generalization / autism / peer involvement

Four high-school age students with autism and severe handicaps were trained to initiate and sustain social interactions with nonhandicapped peers in a commonly shared breakroom at two community job sites. The generalization of social behavior to nontrained co-workers was probed in the same setting during natural breaktimes. A multiple-baseline across subjects design was used to assess the effectiveness of a training package based on concurrent training of chains of responses using systematic prompting and reinforcement of correct behavior. Generalization was promoted using a multiple exemplar strategy. The results showed that all participants acquired a chain of social break behaviors using one peer trainer. Two participants displayed generalization of social responses prior to the acquisition of the complete chain. Two participants required training with multiple peers prior to the occurrence of generalization.

Competitive employment training for mentally retarded adults: The supported work model. <u>American Journal of Mental Deficiency</u>, 86(6), 650-653.

supported work / model programs / job placement

The supported work model designed to train mentally retarded persons for competitive employment was initiated as a pilot program in 1979. The placement rate was 50 percent. In order to investigate the predictors of placement, an empirical analysis was conducted using the theory of work adjustment perspective. Results indicated that the praticipant's work behavior and job skills, ability to meet the requirements of the jcbs, and employment reinforcements were predictors of competitive placement.

<u>Transition from school to work: A study of young adults and their families in Pennsylvania</u>. Philadelphia, PA. Developmental Disabilities Center. Temple University.

Pennsylvania / transition / family involvement / follow-up studies

This monograph represents the results and recommendations of the Pennsylvania transitions survey conducted by Temple University. The goal of employment for every disabled graduate is the ideal. The following recommendations reflect this goal:

 Schools should create curricula which provide for the transition to employment and independent living;

2) Schools should train personnel to provide programs which would prepare students for work;

- 3) The Department of Education, Department of Labor and Industries, and Department of Public Welfare should jointly plan for coordinating services for students in transition; and
- 4) Parent groups should be included in formulation of approaches to problems of transition.

109. Biller, Ernest F. (1987).

<u>Career decision making for adolescents and young adults with learning disabilities</u>. Springfield, IL: Charles C. Thomas, Publishers.

career guidance / learning disabilities / follow-up studies

This book addresses the actual process of qualitative career decision making for adolescents and young adults with learning disabilities. It is divided into three sections. Part One, "Theory," reviews the major theories of career behavior, including trait factor and sociological assumptions, the developmental career theory, and actual decision-making models. The next section, "Research," analyzes 16 follow-up studies of the educational and occupational attainment of adults with learning disabilities. Then, "Practice," the final section, assesses decision making styles and skills and details the appropriate steps for qualitative career decisionmaking. Krumboltz's Social Learning Theory of Career Decision is discussed as a viable approach to understanding an individual's career choice. References and indexes are included.

<u>Final report overview: Model for the Coordination of Post School Training for Special Education Graduates</u>. Olympia, WA: Office of the Superintendent of Public Instruction. (Comp. No. 84.023G - OSERS File No. 67)

Washington / policy research / Model for the Coordination of Post School Training for Special Education Graduates Project

The final overview report provides the state perspective of the Model for the Coordination of Post School Training for Special Education Graduates Project. It focuses on two items: (a) the impact of the project outcomes on state level plans and policies, and (b) dissemination efforts to other interested local education agencies, educators, and agency personnel. This information is meant to supplement the final report and to give the reader a sense of the effects of the project on future state level activities.

113. Conte, Luca Edward (1983).

Sheltered employment and disabled citizens: An analysis of the work stations in industry model. <u>Dissertations Abstracts</u> <u>International</u>, <u>43</u>(9), 2976-A.

sheltered workshops / work stations in industry model / employer involvement

The purpose of this research was to conduct an in-depth study of the work stations in industry model for the provision of sheltered employment to disabled persons. The focus of the research was to: (a) understand the subjective experience and meanings of the work station to clients, staff, and employers, and (b) evaluate the impact of this type of service on the clients, staff, and employers. Utilizing the theoretical perspective of symbolic interactionism, this study examined the advantages and disadvantages of the work station model from each participant's perspective. The results indicated that employers, agency staff and clients perceived significant benefits that were derived from their experiences in the work station program. However, the results also indicated that the work station programs observed in this study had significant shortcomings which limited their utility as either training programs or long-term sheltered employment Recommendations for improving the operation of the work stations observed in this study were suggested. The limitations of this investigation and implications for future research were also discussed.

114. Thomas, M. Angele; & Halloran, William (1987).

Facts and attitudes about adult services for people with severe disabilities. American Rehabilitation, 13(3), 20-25.

attitudes / human services / normalization

This article is concerned with the discrepancy between research which documents that persons with severe handicaps can be capable workers and the reality of high unemployment for these same people. The authors suggest that poor attitudes and lack of information on the part of employers, rehabilitation counselors, vocational educators, special educators, and parents may be responsible for making transitions more difficult. Results and implications of two surveys -- National Association of State Directors of Special Educcation (NASDSE) and National Association of Developmental Disabilities Councils (NADDC) -- are discussed. Peferences are included.

115. Agran, Martin (1985).

An analysis of the effects of a self-control training program on the acquisition and generalization of social behaviors in a work setting. (Doctoral dissertation, University of Ilinois, 1984.) Dissertation Abstracts International, 45(11), 3320-A.

generalization / social skills / work environment

The primary purpose of this investigation was to examine the effects of a self-control training program in facilitating the acquisition and generalization of two social behaviors. Specifically, the effects of a self-instructional training package in increasing the percentage of self-initiated contacts with the supervisor when employees run out of work materials and/or need assistance were examined across five subjects. The self-instructional package was comprised of verbal instruction, modeling, role-playing, corrective feedback, and social reinforcement. Generalized responding was assessed across settings and time.

The results indicate that self-instructional training was effective in increasing the frequency of target behaviors for all five subjects. Further, observational data and social validation data obtained from work supervisors revealed that the training resulted in generalized responding across settings for all five subjects and across time for four subjects (i.e., up to 13-wk). Additionally, an unexpected outcome of this investigation was data that suggested self-instructional training may produce generalization across responses.

<u>Final report</u>. <u>Project Bridge</u>. <u>September 1987</u>. Scottsdale, AZ: Southwest Business, Industry & Rehabilitation Association. (Comp. No. 84.023D - OSERS File No. 8)

final report / Project BRIDGE / Arizona / business and industry

Project BRIDGE, a federally funded program, was designed to develop, test, refine, and replicate a transition model linking secondary level disabled youth with appropriate community resources and ultimately with jobs in the competitive employment market. The program was comprised of three components: Linkage Development, Transition Phase, and Replication. Innovative computer applications assisted in all phases. This final report reviews the background and rationale for the project and then presents the various goals and objectives for each fiscal year. These criteria are then utilized to evaluate the program's performance. The report ends with a summary of results.

120. Ccoper, N. E. (1977).

Vocational reintegration of handicapped workers with assistive devices. <u>International Labour Review</u>, <u>115</u>(3), 343-352.

rehabilitation counseling / wocational rehabilitation / work environment / rehabilitation engineering

The purpose of this article is to take a general look at the two approaches of reintegration of the disabled in employment and how they complement each other. The first approach is what might be called adapting the disabled to the working environment and the second might be described as the ergonomic approach, or adapting the working environment to the particular handicap. Principles and methods are highlighted, as well as promising new developments and areas where further action is needed.

Young people with handicaps: The road to adulthood. Paris: Author.

transition / OECD countries

This volume is an overview of work carried out on the theme of transition to adult and working life between 1982 and 1986 for

OECD countries. It is in four main parts. The first part sets out the aims of the program, its scope and the activities which were undertaken. The second defines and outlines the major issues related to transition which emerged in the program of studies. The third briefly describes innovations and interesting practices during the three stages of transition, namely the final years of schooling, continued education, training and vocational preparation and early adult and working life. The final part draws together major threads, stresses the need for a unified concept of transition with common objectives for all sectors, and suggests future areas for study and activity.

Syracuse University. Special Education Resource Center (1981).

Making integration work. Human policy reports: An action series. Syracuse, NY: Author. (ERIC Document Reproduction Service No. ED 236 819)

mainstreaming / public schools / model programs

Approaches used in public schools across the country to integrate severely handicapped students with nonhandicapped students are Programs have implemented physical integration in a variety of ways, including sending severely handicapped students to neighb rhood schools and dispersing classes of severely handicapped students in regular schools. Integration has been accomplished in such nonacademic activities as school assemblies, fields trips, and social activities. Reverse integration has also been successful: nonhandicapped students volunteer to perform a variety of roles in special classes. Some programs focus on community integration. Elements of successful programs include use of consulting teachers and assistant principals to support regular administrators, decentralization of special services, involvement of vocational specialists, provision of incentives to regular teachers serving severely handicapped students, encouragement of team teaching between special and regular teachers, faculty and parent integration, and use of university students and other volunteers to integrate severely handicapped students.

129. Syracuse University. Center on Human Policy (1986).

<u>Programs demonstrating model practices for integrating resple with severe disabilities into the community</u>. Syracuse, NY: Author. (Sponsoring Agency: Office of Special Education and Rehabilitative Services, Washington, DC). (ERIC Document Reproduction Service No. ED 270 932)

model programs / community integration / attitudes / normalization

Sixty-five model programs striving to integrate people with severe disabilities into their natural communities were nominated and screened via interviews, site visits, and comparison with eight principles of community integration including family scale, community living arrangements, consumer and parent involvement, and development of community living skills. The resulting 41 programs are summarized in terms of services, population, and contact persons. Programs are organized according to state and regional systems, residential services, family support services, and vocational services.

Confessions of a community placement opt sist. Paper based on presentation at the 11th Annual Conference of the Association for Persons with Severe Handicaps, Chicago, IL. (ERIC Document Reproduction Service No. ED 260 551)

community integration / barriers / human services

This paper offers reflections from the author's experience with community placement for developmentally disabled persons, specifically addressing practical and philosophical issues. Drawn from the author's personal involvement with the Macomb-Oakland Regional Center (MORE) in Michigan, this document notes nine illustrations of progress from 1969-1984. It is suggested that siarf at MORE are helped to acquire a sense of urgency, a sense of ownership for solving the problem, commitment to action on behalf of the consumer. Among different ways that agencies and associations have battled successfully with their own service structures are factors involving: relationships with parents, readiness reversal (suggesting that virtually everyone can move

into the community if the right alternatives are created), staff specialized in developing homes, approaches to dealing with the news media, and decisions to avoid distractions that could lead workers off task. Threats to momentum, including prejudice, complacency, and the pull of "institutional gravity," are considered. The paper concludes by asserting the importance of seeing the larger picture in the lives of developmentally disabled persons.

A comparison of preschool and elderly community integration/demonstration projects at the University of Missouri Institute for Human Development. <u>Journal of the Association for Perons with Severe Handicaps</u>, 11(4), 276-235.

community integration / University of Missouri Institute for Human Development / mainstreaming / Aging/Aged Developmentally Disabled (AADD)

This article reviews two community integration projects at the University of Missouri-Kansas City Institute for Human Development which illustrate model development across the life-span. The preschool project is aimed at successfully mainstreaming preschoolers who are handicapped with their nonnandicapped peers through the use of trained volunteers. The elderly project is directed at increasing community integration of elderly persons with developmental disabilities by using nonhandicapped elderly volunteer companions. A description of each project, including project goals, methods, and preliminary results is provided to develop a frame of reference for a comparative discussion of the strengths, weaknesses, and outcomes in these cmmunity-based demonstration projects. Three common variables are discussed: use of trained volunteers, changes in attitudes and knowledge by nonhandicapped volunteers, and measured outcomes for clients. The costs and benefits of model development are summarized.

Social interaction patterns among employees in sheltered and nonprofit business settings. The Career Development Quarterly, 35(2), 123-135.

social skills / work environment / vocational training

In this study social interactions during breaks and work in sheltered and nonsheltered work settings were examined. A number of social skills important for employment success have been suggested, but there is little empirical information, however, that describes how often specific social behaviors actually are required in the work place, the social vocational contexts in which they occur most often, and the parameters that define competent responses. Additional research in these areas is suggested in order to improve work-training programs for the developmentally disabled.

135. Hughes, Carolyn (1985).

The effects of self-instruction on on-task behavior and work performance in a vocational training setting. Unpublished master's thesis, Eastern Montana College, Billings, MT.

vocational training / task analysis / self-control training

The effects of a self-instructional training procedure on the on-task behavior of four mentally retarded adults in a sheltered workshop were investigated using a multiple-baseline design across The subjects chosen had been identified by their trainers as demonstrating a high incidence of off-task behavior. Additionally, the effects of the procedure on the rate and accuracy of task performance were recorded. Results of the study indicated that on-task behavior increased substantially across all subjects following training and generalized from the training to the workshop setting. Furthermore, a two-week follow-up check indicated the on-task behavior maintained over time. **Supplemental** recording indicated rate of production did not increase substantially for any subject. The procedure appeared to be useful in increasing on-task behavior in the workshop setting and was discussed in terms of its implementation and cost effectiveness in a vocational training setting.

SEVIC assessment scales for community integration of the severely/profoundly handicapped. Part I. Pre-entry screening instrument. Chesapeake, VA: Author. (Sponso ing Agency: Office of Human Development (DHEW), Philadelphia, PA. Region 3. Division of Developmental Disabilities.) (ERIC Document Reproduction Service No. ED 167 564)

community integration / normalization / SEVTC assessment scales for community integration $% \left(1\right) =\left(1\right) +\left(1\right) +$

To promote the deinstitutionalization of mentally retarded individuals, a three-phase assessment prescription system has been developed. It conceptualizes return to the community as a series of transfers from a restrictive non-programmatic environment (phase one) through specialized short-term program-oriented rehabilitation (phase two) to the least restrictive living alternatives possible (phase three). The Pre-Entry Screening Instrument is designed for time-efficient screening and the selection of appropriate candidates for phase two. The Instrument is used to interview a parent or a staff member who has worked with the individual for at least three months. A skill profile chart summarizes the data gathered on the Instrument. The Instrument, all data collection sheets, and instructions for administering and scoring are included.

A selective review of the professional literature concerning the transiti process of learning disabled adclescents and adults.

Minneapc s, MN: University of Minnesota - General College. The Secondary/Postsecondary Transition Project for Learning Disabled Youth. (Comp. No. 84.078C - OSERS File No. 117)

learning disabilities / transition / literature review

This article is a brief discussion of the professional literature in the area of learning disabilities that applies to the transition process of LD secondary and postsecondary stidents. Fifty citations are explained under the subcategories of research about the impact of learning disabilities on adolescents, research about postsecondary service delivery models for LD adults, and research about vocational options for LD adolescents and adults. The author concludes that a great deal of information is currently being written about this topic, but it is still preliminary. More research needs to be done to define key concepts and effective materials or techniques in promoting successful transition for individuals with learning disabilities.

Survival skills for learning disabled college students:

Microcomputer word processing in a freshman composition class.

Minneapolis, MN: University of Minnesota - General College. The Learning Disabled College Writers Project. (Comp. No. 84.078C - OSERS File No. 104)

composition / learning disabilities / word processing /
post-secondary education

The Learning Disabled College Writers Project at the University of Minnesota-General College is a study of microcomputer word processing as a bypass strategy for college writiers with learning disabilities. LD students are mainstreamed in a typical freshman composition class where all writing is done on the microcomputer. The study employs pre- and post-intervention measures to assess changes in writing skills, self-esteem, and occupational awareness. Preliminary results from the first year of the project show promise for the microcomputer as an "equalizer" for LD writers to perform on par with their non-learning-disabled peers.

Testimony from learning disabled college writers on the efficacy of word processing in their writing process [working paper]. Minneapolis, MN: University of Minnesota - General College. The Learning Disabled College Writers Project. (Comp. No. 84.078C - OSERS File No. 104)

composition / learning disabilities / word processing /
post-secondary education

This monograph presents interviews with learning disabled college students who have had successful experiences using word processing software in writing and composition.

145. Collins, Terence G.; & Price, Lynda (1986).

Micros for LD college writers: Rewriting documentation for word-processing programs. <u>Learning Disabilities Focus</u>, <u>2</u>(1), 49-54. (Comp. No. 84.078C - OSERS File No. 104)

composition / learning disabilities / word processing /
post-secondary education

Commercially available word processing is being shown to be an effective accommodation for the writing deficiencies of high functioning learning disabled college students. Essential to the success of this accommodation is readable documentation of the software used. Features of previously validated pedagogical interventions are brought to bear on creating documentation and instructions that bypass the generally ineffective and inaccessible instructions accompanying some word-processing products. An example of these procedures is provided.

146. Collins, Terence; & Price, Lynda (1986).

A guide to selecting word-processing software for learning disabled college writers [Working paper]. Minneapolis, MN: University of Minnesota - General College. The Learning Disabled College Writers Project. (Comp. No. 84.078C - OSERS File No. 104)

word processing / learning disabilities / composition /
post-secondary education

This monograph provides guidelines for selection of word processing software for learning disabled college writers.

147. Collins, Terence; & Price, Lynda (1987).

Microcomputers and the learning disabled college writer. Collegiate Microcomputer, 5(1), 26-31. (Comp. No. 84.07&C - OSERS File No. 104)

composition / learning disabilities / word processing /
post-secondary education

A convergence of testimony and experience shows clearly that word processing can be a hospitable by-pass for the writing problems of many learning disabled students. The microcomputer is a versatile tool for the LD writer for a variety of reasons, some of which are not yet fully understood. Software selection and training need to be done with attention to the typical deficits of LD learners. The Learning Disabled College Writers Project continues to research the application of word processing for LD writers in mainstream settings.

A parent, school, community partnership in career education for the mentally retarded. Paper presented at the 63rd Annual Convention of the Council for Exceptional Children, Anaheim, CA. (ERIC Document Reproduction Service No. ED 257 293)

employer involvement / parent involvement / vocational education
/ career guidance

The presentation focused on findings of three studies, and implications for parent-teacher-employer involvement in development and implementation of caree, education programs for

TMR (trainable mentally retarded) adolescents. Study I examined parent and teacher ratings of adaptive behavior and vocational interests. Study II investigated parent, teacher, and employer perceptions of the general goals, objectives, and content of a career education program for this population. Study III involved in-depth interviews with 10 parents from the parent sample of Study I; the interviews investigated concerns, hopes, and fears for their children, particularly related to life skills development. Across the studies, perceptions of parents, teachers and employers regarding the goals, objectives, and content of a career education program were generally consistent. strongly supported the teaching of academic skills than did teachers or employers. Predominant concerns of parents included he relatively little feedback from psychologists and teachers on assessment and educational progress. The consistency among perceptions of the groups was felt to hold promise for partnership in TMR career education.

Financial implications of half- and full-time employment for persons with di abilities. Exceptional Children, 54(3), 272-276.

income / half-time employment / cost effectiveness / disincentives
to work

Increased financial well-being is often assumed to be a benefit full-time employment for handicapped individuals. However, there is some evidence that this is not true. In this study a balance sheet approach was utilized to examine the financial implications of part-time and full-time employment for persons with handicaps. Balance sheets (income versus expenses) were developed for three income levels: no earned income, income from a part-time (20 hours a week) job, and income from a full-time (40 hours a week) job. The results indicated that net disposable income was comparable for individuals working part time when compared to individuals working full time. In either case, the net disposable income is no more than \$3,000 over the net disposable income for an unemployed person. This provides evidence that there is an absence of financial incentives for full-time employment and suggests that persons with disabilities should carefully consider the financial effects of potential employment.

The role of work in psychiatric rehabilitation: A therapeutic alternative to competitive employment. An earlier version of this paper was presented at the Annuai Meetings of the Midwest Sociological Society, Chicago, IL.

Thresholds / psychiatrically disabled / vocational rehabilitation

The Thresholds Visiting Chefs Program is designed to provide severely mentally ill youth with the opportunity to work with a professional chef in preparation of a noon meal for some 100 rehabilitation clients. Meal preparation is part of the regular rehabilitation program for these psychiatrically disabled young people, and the work with a visiting professional represents an innovative, vocational experience that may be superior to traditional options. This paper first explores the debate surrounding the value of work for young people's personal, moral, vocational and social development, and then evaluates this innovative program according to criteria put forth by authors critical of youth employment. Qualitative analysis of the youngsters' evaluations of the experience indicate that working with a professional chef in a favilliar environment is a positive and rewarding vocational experience. Further, correlation analysis indicates the presence of relationships between learning, motivation and involvement in the program. These findings are discussed in light of the dispute over the value of work for teenagers, and effective alternatives to competitive emrloyment are suggested.

The Illinois Competitive Employment Project: Enhancing transition through interagency collaboration: The final report. Champaign, IL: University of Illinois. (Comp. No. 84.023G - OSERS File No. 56)

final report / Illinois Competitive Employment Project (ICEP) / transition / interagency cooperation

The purpose of the Illinois Competitive Employment Project (ICEP) as stated in the original proposal was to "implement a project that would lead to cooperative programming between the local rehabilitation agency and the two local educational agencies." The primary purpose of this final report is to present information regarding the evaluation of the effectiveness of the Illinois Competitive Employment Project. This report will attempt to:

(a) provide information related to the degree of success and viability of the Project, and (b) provide information to maximize the possibility of success and viability in the replication of the project. First, a review of specific problems related to transition and the goals stated in the original proposal to address these problems is presented. Second, an overview of the community as well as the services available to persons with moderate, severe, or profound mental retardation in the Champaign-Urbana areas is provided. Finally, a description of the activities that were introduced to enhance transition efforts is discussed.

Project PET. Annual report. Kirksville, MO: EDGE, Inc. (Comp. No. 84.158C - SERS File No. 39)

Project PET / annual report / transition / community integration / interagency cooperation

This annual report summarizes activities from year one of Project PET according to the project goals of:

 defining the responsibilities of school personnel, parents, and adult service providers and establishing a cooperative plan to ensure the effective and timely transition of graduating students with handicapping conditions to the working world;

2) implementing these identified responsibilities through a model Community Transition Center;

3) monitoring the implementation of the identified responsibilities to determine the effectiveness and efficiency of the cooperative plan; and

4) disseminating the results of the implementation of the identified responsibilities to service providers in other

geographic areas.

Highlights of year one include the success of interagency cooperation and community acceptance, as well as higher expectations for the individuals served due to the change in attitudes, philosophies, and willingness to work together. Appendixes are included.

Employer attitudes toward hiring the learning disabled. <u>Journal of Learning Disabilities</u>, 20(1), 53-57.

employer attitudes / learning disabilities / discrimination

To determine attitudes about employing workers with learning disabilities, 326 employers from six states were surveyed about their attitudes toward hiring the handicapped in general and the learning disabled in particular. The employers expressed positive attitudes toward making special allowances for handicapped workers as long as such allowances did not involve reduced workloads or involvement in the worker's personal life. Less positive attitudes were expressed toward hiring the learning disabled. Only one-half of the employers stated that they would hire workers with learning disabilities. These negative attitudes did not seem to be related to lack of knowledge about learning disabilities, but rather seemed to relate to prejudice against workers with learning disabilities or lack of experience in supervising such workers.

164. Tryjankowski, Elaine M. (1987).

Convergent-discriminant validity of the Jewish Employment and Vocational Service System. <u>Journal of Learning Disabilities</u>, 20(7), 433-435.

Jewish Employment and Vocational Service Work Sample System (JEVS) / learning disabilities / prevocational skills

This study investigated the construct validity of five perceptual traits with five simulated work samples from the Jewish Employment and Vocational Service Work Sample System (JEVS). The subjects, mean CA 14.4, were 36 applicants with learning disabilities who attended a prevocational assessment program. Utilizing the paradigm of convergent-discriminant validity, convergent validity (p<.01) was evidenced in four of the five work samples and discriminant validity (p<.01) was demonstrated in three of the five work samples. The results indicate that simulated work samples can be used as a diagnostic instrument for assessment of perceptual abilities in a vocational setting.

Behavioral assessment of occupational skills of learning disabled adolescents. <u>Journal of Learning Disabilities</u>, 15(1), 38-41.

learning disabilities / behavioral analysis / vocational evaluation / secondary education

Little information is available on the levels of basic living skills of learning disabled adolescents. Using direct observation techniques, this study analyzed the differences in levels of occupational skills between LD youths and their non-LD peers. The results showed low levels of employment-related skills for both groups of high school adolescents. However, the non-LD high school students performed significantly better on the job-related skills than their LD peers. These differences were more marked for nonsocial interaction skills than for social skills. These findings suggest the need for methods of teaching LD youths the skills of finding and retaining employment.

172. Greenan, James P. (1982).

Problems and issues in delivering vocational education instruction and support services to students with learning disabilities. Journal of Learning Disabilities, 15(4), 231-235.

vocational education / learning disabilities / special education / career guidance

Vocational education has several programs and services that should be accessible to all handicapped students, including the learning disabled. Skill training, cooperative work education, work-study, and youth organizations are some available programs from which these students could benefit. However, problems and issues relating to attitudes, personnel preparation, funding, and interagency cooperation and agreements frequently inhibit the delivery of vocational programs and related services to these Vocational and special educators should work together as a team to provide vocational education instruction and the necessary support services to these students. Numerous resources. such as instructional guides, are currently available to assist the special educator in becoming familiar with the concepts, ideas, information, and processes that relate to serving the handicapped in vocational education. These resources and information will help special educators with increasing their knowledge and participation in providing vocational and career opportunities to LD students.

173. Shapero, Susan; & Forbes, C. Rebecca (1981).

A review of involvement programs for parents of learning disabled children. <u>Journal of Learning Disabilities</u>, <u>14</u>(9), 499-504.

parent involvement / learning disabilities

The literature on involvement programs for parents of learning disabled children was reviewed to discover the types of programs attempted, their results, and their implications. The most common program types were tutoring and counseling. Results for both types were generally positive. The most effective counseling programs combined counseling with academic tutoring and/or praise for academic performance. Effective tutoring programs combined positive reinforcement with reading and/or perceptual skills. The studies reviewed support the value of parent involvement. Implications include the need for stronger experimental research, comparison studies between tutoring and counseling programs, more efficient evaluation, and follow-up studies.

Kavale, Kenneth A.; Forness, Steven R.; & Bender, Michael. 1987.

<u>Handbook of learning disabilities</u>. <u>Volume I: Dimensions and diagnosis</u>. Boston, MA: Little, Brown & Co.

learning disabilities / evaluation / multidisciplinary assessment

This first volume of the <u>Handbook</u> deals with defining learning disabilities and determining how individuals should be classified as learning disabled. Focus is a assessment as a multidisciplinary process and how the components interrelate to reach a final decision about an individual's LD status. Vol. I provides a comprehensive overview of the problems inherent in the field, the primary characteristics associated with learning disabilities, and the means by which we determine the presence or absence of LD in a child. References and an index are provided.

175. Crewe, Nancy M.; & Athelstan, Gary T. 1984.

<u>Functional assessment inventory manual</u>. Menomonie, WI: University of Wisconsin-Stout, Materials Development Center, Stout Vocational Rehabilitation Institute.

Functional Assessment Inventory (FAI) / vocational evaluation / vocational rehabilitation

This new edition of the <u>FAI</u> has undergone field testing and revisions for almost a decade and reflects a major change of the elimination of two problematic items ("coordination" and "persistence") and the addition of two new ones ("need for specialized placement or accommodations" and "initiative and problem-solving ability"). Several minor changes have also been made to eliminate ambiguity. This manual explains the need for functional assessment in vocational planning, presents the issues in the development and use of the FAI, and describes the development of the FAI and how to use it.

176. Botterbusch, Karl F. 1987.

<u>Vocational assessment and evaluation systems: A comparison</u>.

Menomonie, WI: University of Wisconsin-Stout, Materials
Development Center, Stout Vocational Rehabilitation Institute.

vocational evaluation / work samples

This publication is the fifth in a series from the Materials Development Center since 1976 offering an objective comparison of commercial vocational and assessment systems. This series has sought to provide vocational evaluators, special educators, vocational educators, manpower specialists, corrections personnel, and private rehabilitation practitioners with accurate and detailed information on widely available vocational evaluation and assessment systems. References are included with most of the 21 tests.

<u>VECTOR, a new direction: Final project report</u>. Eden Prairie, MN: Hennepin Technical Centers. (Sponsoring Agency: U.S. Department of Education, Office of Specia Education and Rehabilitative Services, Youth Employment Projects, Washington, D.C.) (Comp. No. 84.023D - OSERS File No. 11)

final report / Minnesota / model programs / vocational education
/ special education

This is the final report for Project VECTOR, a three-year model program which was piloted at District 287 Vocational Technical Center's south campus in Eden Prairie, MN. The report focuses on the evaluation of project effectiveness as it relates to outcome, consumer responses, and outside evaluations which were conducted specifically by a project consultant and a state evaluation team. A discussion of project goals and accomplishments are included, as well as a bibliography of curricular materials.

Grays Harbor Transition Project: Final evaluation report.
Redmond, WA: Author. (Sponsoring Agency: U.S. Department of Education, Office of Special Education and Rehabilitative Services) (Comp. No. 84.158C - OSERS File No. 50)

final report / Washington / Grays Harbor Transition Project

This is the final report for the Grays Harbor Transition Project. The Project involved funding a team to assist a consortium of schools to plan and implement a transition program which would meet the service and employment needs of handicapped individuals as they leave school. This monograph describes the project, presents the strategy and evaluation components of the project, and includes products of the project.

179. Moran, T. Kenneth (1987).

Research and managerial strategies for integrating evaluation research into agency decision making. <u>Evaluation Review</u>, <u>11</u>(5), 612-630.

program evaluation / research synthesis / program development

This article discusses the strategies employed in integrating evaluation research into the management of an organization. The project employs a combination of qualitative and quantitative research methods to develop information on the processes, procedures, and behavior of the agency. The project is guided by the belief that if evaluation research is to become an integral part of management, the methods and results must be easily understood by the managers. This article also discusses the methodological and managerial problems encountered in integrating evaluation research into the policymaking of new public agencies.

180. Shadish, William R.; & Epstein, Roberta (1987).

Patterns of program evaluation practice among members of the Evaluation Research Society and Evaluation Network. <u>Evaluation Review</u>, <u>11(5)</u>, 555-590.

program evaluation / Evaluation Research Society / Evaluation Network

3

Using stratified random sampling of the membership directories of the Evaluation Network and the Evaluation Research Society, a survey was conducted of the practices of program evaluators. Those practices factored into four patterns -- academic evaluation, stakeholder service evaluation, decision-driven evaluation, and outcome evaluation. The patterns were differentially related to such factors as disciplinary background, organizational setting, and evaluation theory.

Review and analyses of existing national data on vocational special needs education. University Park, PA: The Pennsylvania State University, Division of Occupational and Vocational Studies. (Sponsoring Agency: American Vocational Association, Special Needs Division) literature review / data analysis / vocational special needs education

This document contains a list of annotated abstracts concerning cost-benefit analyses, program funding, teacher training, and enrollment of vocational-special needs, i.e., disadvantaged, handicapped and limited English-speaking students in the United States. Information was collected through the search of Dissertation Abstracts International, ERIC, and the U.S. government publication, American Statistical Index (ASI) abstracts.

182. Curtis, Charles K.; & Shaver, James P. (1987).

Modifying attitudes toward persons with disabilities: A review of reviews. <u>International Journal of Special Education</u>, 2(2), 103-129.

attitudes / research synthesis

Fifteen reviews of primary research pertaining to changing attitudes toward persons with disabilities were located by an extensive literature search. With the primary research report as a model for reporting reviews of research, questions developed from Jackson (1978, 1980) and others were used to critically examine the reviews in terms of their methodological soundness, their contributions to knowledge, and the applicability of their findings. Methodological weaknesses noted in most reviews, and common to narrative reviews of research, seriously weakened the validity of their findings. Suggestions for future reviews in this area are included.

183. LaCampagne, John; & Cipani, Ennio (1987).

Training adults with mental retardation to pay bills. Mental Petardation. 25(5), 293-303.

independent living / money-management / chaining

The effectiveness of a forward chaining, partial-task t aining method on the acquisition of bill-paying skills via check writing with four adults with development I disabilities who attended a day treatment program was assessed. Results indicated that the procedures were effective in training three skill areas of bill paying to high levels of performance. Further, the skills maintained over a two-month follow-up and generalized across novel types of bills. Social validation data obtained through bank personnel and teachers examining pre- and posttreatment checks indicated that the training procedures produced a skill level that would lead to a successful financial transaction.

Institutions cost more than community services. American Journal of Menta Deficiency, 92(2), 136-138.

expenditure studies / community integration

In this article, the author comments on Braddock, Hemp, & Fujiura's (1987) [see Entry No. 185] analysis of federal and state budgets and expenditures on the mentally retarded in the U.S.

185. Braddock, David; Hamp, Richard; & Fujiara, Glenn (1987).

National study of public spending for mental retardation and developmental disabilities. <u>American Journal of Mental Deficiency</u>, 92(2), 121-133.

community integration / policy research / expenditure studies

Results of a nationwide study of public mental retardation/developmental disabilities (MR/DD) spending in the states during Fiscal Years 1977 through 1986 were summarized. Trends identified included: (a) continuing growth in spending for community services, (b) contraction of total spending for institutional operations, and (c) predominance of ICF/MR support in large (16+beds) congregate care settings. Periodic replication of the study was recommended, as was additional research to identify the political and economic determinants of state MR/DD spending.

Final evaluation report: The job training and tryout project. Washington, DC: The George Washington University. (Comp. Mac. 84.023G - OSERS File No. 54)

final report / Washington, DC / model programs / Job Training and Tryout Project

This is the final evaluation report for the Job Training and Tryout (JT&T) Project, a three-year model program designed to provide employability skills training, job tryouts, supported job placements, and follow-up services to mildly mentally retarded and severely learning disabled young adults, aged 18-22. Goals, objectives, and accomplishments are described. Tables and appendixes of forms are included.

187. Katski, Mary Ann; Mendelson, Marsha; Foster, Jenny; Tilson, George; & Neubert, Debra. (198/).

Transitional programming for mildly disabled out of school young adults: An implementation manual. Washington, DC: The George Washington University. (Comp. No. 84.023G - OSERS File No. 54)

Job Training and Tryout Project / program dev∈lopment

This manual was developed to serve a variety of reeds. Used in its entirety, the manual provides organizations and/or individuals with a systematic approach to developing a program offering employability skill training, job placement and follow-up support to individuals requiring assistance in obtaining and maintaining a job. In itself each section can serve as a resource. This manual provides a step-by-step approach that enables the reader to implement the JT&T program. Many sections feature "pointers," guidelines developed by the JT&T staff, that increase the effectiveness of the procedures outlined. A case study to illustrate the use of specific procedures is presented in each section.

188. Katski, Mary Ann, et al. (1987).

Job Training and Tryout employability skills curriculum [DRAFT]. Washing on, DC: The George Washington University. (Comp. No. 84.023G - OSERS File No. 54)

curriculum / Job Training and Tryout Project

The JT&T staff has developed an initial draft of an employability skills curriculum which is currently being field tested with JT&T participants. Topi: areas covered in this curriculum include: occupational and self-awareness; job seeking skills; personal, social, and work adjustment skills; effective communication; and decision-making. Participants are also taught methods for exploring and obtaining information from local businesses, community colleges, and vocational training centers. Once revised, program staff plan to advertise the availability of the curriculum at local, state and national conferences.

Transition of Severely Disabled Youth from School-to-Work: A demonstration model. Human Resources Center. Final report. Albertson, NY: Human Resources Center. (Comp. No. 85.158A - OSERS File No. 29)

final report / New York / School-to-Work Transitional Services Project

This is the final report of the three-year funded School-to-Work Transitional Services Project. An overview of the project is

included with objectives, services and activities, issues, barriers, and conclusions and recommendations. Appendixes are attached.

209. Flugman, Bert; Goldman, Leo; Katz, David; Lee, Mildred K.; & Lynch, Maureen (1987).

Career related interpersonal skills for special education students: A high school curriculum. New York: City University of New York. Center for Advanced Study in Education (CASE). (Comp. No. 84.078B - OSERS File No. 90)

social skills / special education / curriculum

This guidebook is addressed to special education teachers, counselors, career educators, and others who work with special education students in high school. The book is a resource that educators can use to help special education students improve some of the interpersonal skills that are important in all aspects of living, but especially on the job. The goal of this curriculum guide is to increase the employability of special students - their effectiveness in getting and keeping a job. It focuses on 10 interpersonal skills, one in each chapter, progressing from the simple to the more complex.

210. Lee, Mildred K.; & Katz, David (1987).

Training parents as career educators of children with handicapping conditions: A manual for parent educators. New York: City University of New York. Center for Advanced Study in Education (CASE). (Comp. No. 84.078B - OSERS File No. 90)

parent involvement / special education / career guidance

The purpose of the manual is to assist parents of special education pupils, particularly pre-adolescents and early adolescents, to help their children with career information, career choices, and eventually transition from school to the "world of work." This resource manual addresses the training needs of a wide variety of parent educators and parent group facilitators. A bibliography and appendix are included.

<u>School-to-work transition for handicapped youth: Perspectives on educational and economic trends</u>. Champaign, IL: University of Illinois, Office of Career Development for Special Populations.

competitive employment / vocational education / work environment
/ special education / interagency cooperation

This monograph documents the papers presented at the Second and Third Annual Forums of the Interdisciplinary Leadership Preparation Program (INT) at the University of Illinois, a project funded through OSERS to train professionals to facilitate adoption and use of improved practices in the area of unemployment and school-to-work transition for handicapped youth. These forums focused on employment trends and issues, their impact on populations with disabilities, and a review of current theories of transition and how they relate to what is actually taking place in the field. Seven of the 8 papers are supplemented with a commentary by INT graduate students. These statements note the significant points of each paper and offer supplementary perspectives on selected issues. References are included.

212. Mischio, George; & Dalke, Connie (1987).

<u>Project ASSIST - a demonstration project (Adult Services Supporting Instructional Survival Tactics): Final report.</u> Whitewater, WI: University of Wisconsin-Whitewater. (Comp. No. 84.078C - OSERS File No. 105)

final report / Wisconsin / post-secondary education / Project ASSIST

This final report for Project ASSIST, a two-year, model demonstration program for college students with learning disabilities, outlines the goals and objectives of the project, and discusses and evaluates the goals from the perspective of the four major project components: (a) administration, (b) demonstration, (c) dissemination, and (d) evaluation. Recommendations for future projects and directions for additional research and practice are also made. Appendixes are included.

213. Flugman, Bert; & Perin, Dolores (1987).

Redirecting vocational training to the community college: A purchasable option for mildly handicapped consumers: Final report. New York: City University of New York, the Graduate School and University Center, Center for Advanced Study in Education, Institute for Researc' and Development in Occupational Education. (Comp. No. 84.078B - OSERS File No. 90)

final report / New York / post-secondary education / vocational training

The final report for this three-year demonstration project presents a project summary, accompanied by case studies of success and failure, program evaluation for each of the three years, and curricula for skills instruction. Appendixes are included.

214. Stephens, Robin; & Haley, Pat (1987).

Final report: Employability Support Network of Disabled Youth. Portland, OR: Oregon Health Sciences University, Crippled Children's Division. (Comp. No. 84.023D - OSERS File No. 14)

final report / Oregon / support groups / Employability Support Network of Disabled Youth

The Employability Support Network's final report overviews the project and describes initial barriers encountered when attempting their first goal of creating an advisory committee. The second goal of adapting and developing curricula was the basis for an extensive library and development of a bibliography which is included. Another objective was to publish a replication handbook, telling others how to set up support groups in this region, as well as describing activities for these groups. The first handbook, The empowerment dynamic: Synergistic activities for support groups is included (see also separate entry #105 in vol. 2, Annotated bibliography on transition from school to work), as well as appendixes.

A review and evaluation of interventions implemented by Faribault State Hospital for selected class members in Welsch v. Levine. Madison, WI: University of Wisconsin. (Comp. No. 84.023D - OSERS File No. 18)

program evaluation / Faribault State Hospital / Wisconsin

This report is a review of the experience of three residents of Faribault State Hospital (FSH). All three are class members of the Welsch v. Levine Consent Decree. The review included a brief visit with the clients as well as relevant staff; however, most of the information contained in this report was gleaned from over 1,200 pages of FSH and other reports and evaluations of these class members. In order to orient the reader to their history, summary tables are provided on the habilitation programs as well as behavioral, chemical, mechanical and physical restraint procedures utilized with these individuals over the years are presented in Tables A-1, A-2 and A-3. It should be noted that these tables have sizeable gaps of missing entries. It can be inferred that this information was either not available for review or undocumented. Critical aspects of programming and treatment are delineated with descriptions in each category coming directly from all available reports.

Mediating behavior challenges presented by individuals with dual sensory impairments [pre-publication copy]. The Association for Persons with Severe Handicaps. (Comp. No. 84.023D - OSERS File No. 18)

behavior modification / non-aversive procedures / behavioral analysis

This module provides a format for introducing behavior management techniques based on assessment information and positive programming strategies for individuals with dual sensory impairments and/or other severe multiple impairments. Information on and strategies for understanding the communicative functions of aberrant behavior are provided to assist parents, teachers, related service personnel (e.g., occupational therapists, physical therapists, speech and language therapists, psychologists), vocational supervisors and direct care personnel. Legal and ethical considerations regarding the use of aversives are discussed, emphasizing the advantages of using nonaversive strategies. The importance of assessing behaviors in terms of communicative intent, programming, motivational and environmental factors are presented, followed by positive programming strategies and basic behavior technology definitions and examples.

Harnisch, Delwyn L.; Fisher, Adrian T.; & Carroll, Chuck (1988, February).

Analysis of seven behavioral domains of independent living. Paper presented at the American Council on Rural Special Education Annual Conference, Monterey, CA.

independent living / rural areas / behavior analysis

To formulate a better understanding of independent living, a definition has been derived to cover various aspects of one's life by identifying a number of critical domains to life where the person has to have skills, or will face various challenges from the external environment. In this study, analysis of these seven domains has been made in order to derive scales to be used to differentiate between groups with special handicaps and between those with and without handicaps. This facilitates the identification of those areas of special needs that can be best addressed within the education framework, and thus assist in overcoming the most pressing difficulties which restrict the growth of true independence of those who have disabilities. Results of the study are discussed in rural and non-rural schools contexts.

224. Alemi, Farrokh (1987).

Subjective and objective methods of evaluating social programs. Evaluation Review, 11(6), 765-774.

program evaluation / human services

A practical problem in evaluation studies with limited resources is that all methodologies cannot be tried. Thus the evaluator must decide what questions must be answered and then choose which method would best provide the answers. The choice, however, is not simple. It involves several different trade-offs. These trade-offs are articulated through a discussion of the differences between (a) Bayesian and traditional statistics, (b) decision and cost benefit analysis, and (c) anthropological and traditional case studies. The intent of the article is to make evaluators sensitive to the implicit trade-offs associated with choosing a subjective or an objective method.

An analysis of occupational requirements relative to the employment of severely handicapped individuals (Working Paper #87-3). Bloomington, IN: Indiana University, School of Education, Center in Innovation in Teaching the Handicapped, Project COMPETE. (Comp. No. 84.158A - OSERS File no. 26)

Indiana / Project COMPETE / job analysis / job placement

This working paper is a product of Project COMPETE, whose purpose is to develop and validate a model that applies the results of previous research and exemplary practices to developing a training sequence to assist retarded youth in making the transition from school to employment in a competitve environment. This study examined the communication, critical academic skill, and machine/tool use requirements reported by employers for 104 selected entry-level jobs in a midwestern city of approximately 30,000 residents. The jobs subjected to analysis were representative of six occupational clusters identified on the basis of a labor market trend analysis, their potential for initial access and employment stability for moderately mentally retarded workers, and structured interviews with employers. Analysis of the data indicates that a large percentage of entry level jobs may require minimal communications skills, and no critical academic skills or basic applications of academic skills. The general process by which the study was conducted and a discussion of the programming implications are presented.

<u>Project MEAL (Model for Employment and Adult Living): Final report and replication model.</u> Phoenix, AZ: Research and Development Training Institutes, Inc. (Comp. No. 84.158C - OSERS File No. 51)

Project MEAL / final report / Arizona / learning disabilities

The final report for the Project MEAL (Model for Employment and Adult Living) model describes a program for post-high school preparation of the unemployed, learning disabled, young adult population for sustained employment. Strategies of assessment, tutoring, job development, and tracking are outlined, as well as problems encountered during project implementation. Evaluation of project effectiveness and references conclude the report.

243.

Menchetti, Bruce Michael (1987).

An analysis of select psychometric properties of the Vocational Assessment and Curriculum Guide. Unpublished doctoral dissertation. University of Illinois, Urbana, IL.

social skills / Vocational Assessment and Curriculum Guide (VACG) / vocational evaluation

This study examined several psychometric properties of a behavior rating scale designed to measure the social and vocational skills of persons who are disabled. The draft of the Vocational Assessment and Curriculum Guide (VACG) used in this study employed a first person assessment procedure typical of adaptive behavior measurement. Major findings of this study suggested that the VACG was a reliable and valid assessment instrument and can be a useful tool in the vocational evaluation of persons who are disabled.

<u>Vocational evaluation in special education</u>. Boston, MA: Little, Brown & Co.

vocational evaluation / special education / vocational
rehabilitation

The purpose of this book is to detail how vocational evaluation may be used effectively by both educators and vocational rehabilitation professionals in working with disabled students to identify relevant skills, develop career oriented educational activity, promote effective transition from school to work, and maximize vocational potential needed to link the special-needs student with the world of work. The text is divided into three sections. first section provides a historical understanding of the growth, direction, and present emphasis of education and vocational rehabilitation of disabled individuals. The second section identified the vocational evaluation process with special-needs students and assists the reader in understanding how to use the varied vocational evaluation tools, tests, techniques, and activities. The third section includes chapters identifying vocational evaluation emphasis with specific disabilities in order to demonstrate differences in evaluation emphasis and application. References and appendixes are included.

Transition services for young adults with severe disabilities: Defining professional and parental roles and responsibilities. Journal of the Association for Persons with Severe Handicaps, 12(2), 87-95.

parent involvement / interagency cooperation / individualized transition plans / vocational education / special needs personnel

As transition planning and implementation procedures evolve across the country, professionals and parents are struggling with the roles and responsibilities they need to assume to ensure meaningful adult outcomes for young adults with disabilities. This article outlines "optimal" roles and responsibilities and discusses these roles in interagency and transdisciplinary teams.

252. Agran, Martin; Salzberg, Charles L.; & Stowitschek, Joseph J. (1987).

An analysis of the effects of a social skills training program using self-instructions on the acquisition and generalization of two social behaviors in a work setting. <u>Journal of the Association for Persons with Severe Handicaps</u>, <u>12</u>(2), 131-139.

social skills / work environment / self-control training

This investigation examines the effects of a social skills training program using self-instructions in facilitating the acquisition and generalization of two social behaviors in a work setting. Specifically, this study examined the effects of the training package in increasing the percentages of initiations with a supervisor when employees ran out of work materials and/or needed assistance. The results indicated that the training effectively increased the percentages of occurrence in one or both of the target behaviors for all five participants. Furthermore, the training resulted in generalized responding across settings for all participants and maintained for up to 13 weeks. These results suggest the feasibility of a social skills training package using self-instructions to help persons with moderate and severe handicaps acquire, maintain, and generalize social behaviors in a work setting.

The integrated programming team: An approach for coordinating professionals of various disciplines in programs for students with severe and multiple handicaps. <u>Journal of the Association for Persons with Severe Handicaps</u>, <u>12</u>(2), 107-116.

parent involvement / interagency cooperation / program development / individualized education program (IEP)

Historically, several different team structures have been used to provide assessment and programming by various disciplines in educational settings. Student goals are established on the basis of isolated assessments by each team member with remedial programming provided through either direct (hands-on) or indirect (consultative) services. This article describes an alternate approach to team programming that uses parents and professionals to select unified programming goals, provide direct and indirect related services, integrate programming methods, and monitor student progress. Program philosophy and overall functional assessment-curriculum organizes team members and guides implementation within various educational structures serving students with severe disabilities.

<u>Postsecondary Model for Learning Disabilities (PS IM LD): Final report</u>. Lincoln, NE: University of Nebraska, Department of Special Education and Communication Disorders. (Comp. No. 84.078B - OSERS File No. 89)

final report / Nebraska / learning disabilities / post-secondary education

The Postsecondary Intervention Model for Learning Disabilities (PS IM LD) was designed to extend the continuum of special support services for learning disabled individuals into higher education. A visible program with personnel specializing in language and learning disabilities was integrated into the existing network of campus resources for student services at the University of Nebraska in Lincoln. It provided the only program in the State of Nebraska for the language-learning disabled (LLD) population that specifically addressed the issues of promoting an accepting and supportive climate, increasing awareness of service availability, documenting the incidence of LLD students, and providing adapted education alternatives. This final report outlines project accomplishments and products and discusses the demographics, evaluation, verification, and adapted educational activities, as well as dissemination and replication activities. Subsequent entries (Entry Nos. 261-266) describe project products.

Student handbook. Lincoln, NE: University of Nebraska, The Barkley Memorial Center, Postsecondary Intervention Model for Learning Disabilities. (Sponsoring Agency: Office of Special Education and Rehabilitative Services, U.S. Department of Euscation) (Comp No. 84.078B - OSERS File No. 89)

Nebraska / learning disabilities / Postsecondary Intervention Model for Learning Disabilities

This handbook introduces the prospective learning disabled student to the Postsecondary Intervention Model for Learning Disabilities (PS IM LD), its support services, and to the University of Nebraska-Lincoln.

264. Friedman, Brenda G.; Leuenberger, Janice E.; & Morris, Mary J. (1985).

Word study: A problem-solving strategy for reading comprehension (Study Manual #2). Lincoln, NE: University of Nebraska, The Barkley Memorial Center, Postsecondary Intervention Model for Learning Disabilities. (Sponsoring Agency: Office of Special Education and Rehabilitative Services, U.S. Department of Education) (Comp. No. 84.078B - OSERS File No. 89)

learning disabilities / reading cmprehension / word study / Nebraska

PS IM LD has prepared information regarding the use, the meaning, and the structure of words, the building blocks of all language. Section I of this manual draws students' attention to the expedient use of authors' contextual information to promote accurate and efficient reading comprehension. Sections II and III deal, respectively, with sound-symbol and with structural cues to aid word identification. Taken together, the sections are intended to aid the LLD student and the project tutor in their common effort to adopt a more comfortable and effective reading style.

265. Friedman, Brenda G.; Leuenberger, Janice E.; & Morris, Mary J. (1985).

Writing: The research paper (Study Manual #3). Lincoln, NE: University of Nebraska, The Barkley Memorial Center, Postsecondary Intervention Model for Learning Disabilities. (Sponsoring Agency: Office of Special Education and Rehabilitative Services, U.S. Department of Education) (Comp. No. 84.078B - OSERS File No. 89)

learning disabilities / research paper writing / Nebraska

PS IM LD has prepared this manual to help learning disabled students master this key academic task of research paper writing. This manual discusses in depth the processes involved and suggests appropriate resources at the end for further study.

266. Friedman, Brenda G.; Leuenberger, Janice E.; & Morris, Mary J. (1985).

Test preparation and test taking techniques (Study Manual #1). Lincoln, NE: University of Nebraska, The Barkley Memorial Center, Postsecondary Intervention Model for Learning Disabilities. (Sponsoring Agency: Office of Special Education and Rehabilitative Services, U.S. Department of Education) (Comp. No. 84.078B - OSERS File No. 89)

learning disabilities / post-secondary education / test taking skills / Nebraska

This study manual provides the learning disabled college student with more efficient ways of adapting commonly accepted learning techniques to his/her unique learning situation. Attention is directed to the student's choices and activities before, during, and after a testing situation.

ERIC/OSEP Special Project on Interagency Information
Dissemination. ERIC Clearinghouse on Handicapped and Gifted
Children. Council for Exceptional Children. (1987).

Master directory: Research projects currently funded by U.S. Department of Education, Office of Special Education and Rehabilitative Services, Office of Special Education Programs. Division of Innovation and Development. Reston, VA: Author.

directories / Office of Special Education and Rehabilitative Services (OSERS)

This directory provides basic in ormation on all research projects currently funded by the Division of Innovation and Development, Office of Special Education Programs, U.S. Department of Education. The projects included here are the field-initiated and student-initiated grants, most of the directed competitions, and the secondary transition and technology grants.

268.
Amarillo College. Access Division. Accessibility Services (Producer) (1987).

<u>Introduction to Project T.A.P.S.</u> [Videocassette]. Amarillo, TX: Producer. (Comp. No. 84.078C - OSERS File No. 167)

Project TAPS / Texas / learning disabilities / post-secondary education

This video explains what Amarillo College's ACcess Division and ACcessibility Services are doing to help students with learning disabilities transition into college and into work settings. Particularly, Project T.A.P.S.' (Transition Assistance for Post-Secondary Placement) purpose is to help students with learning disabilities get accommodations, resources, counseling, and training for transitioning to college. Students are helped on an ind. Idual basis with notetaking, taped textbooks, oral tests, large-print books, and interpreters. The program has a high success and retention rate.

269. Long Island University. C. W. Post Center. Department of Special Education (Producer) (1987).

<u>Project READDY</u>. <u>The READDY Program</u> [Videocassette]. Greenvale, NY: Producer. (Comp. No. 84.023G - OSERS File No. 62)

Project READDY / New York / autism / vocational training

The rationale for a program such as Project READDY is explained by project director Diane Berkell, who notes that Project READDY originated to fill a gap for autistic and severely developmentally disabled students. Before Project READDY these special education students were excluded from vocational programs which would prepare them for post-school settings in the community. This first part of the videocassette demonstrates successful on-the-job training using job trainers at a supermarket and restaurant. Students from Project READDY have been well accepted and liked by their co-workers and valuable to their employers. The second part of this videocassette provides positive employer's perspectives on the project and its students.

<u>Supported employment in Illinois: Job coach issues</u> (Vol. 3). Champaign, IL: Secondary Transition Intervention Effectiveness Institute. University of Illinois.

Illinois / supported work / job coach / Illinois Supported Employment Program (ISEP)

This is volume 3 in the <u>Supported Employment in Illinois</u> series (previous entries in this set are under entry nos. 104 and 159). Its focus is on the role of job coach as key facilitator of community employment for a population whose members were previously restricted to segregated settings and were considered inconsequential producers. The three case studies included in this volume evaluate in depth three programs associated with the

Illinois Supported Employment Program (ISEP) to discover the real and preceived duties involved in the position of job coach. This report has implications for the inservice and preservice training of job trainers and may be used as a resource by those professionals who want to replicate supported employment programs within their own agency. References and a directory of funded projects are included.

Bruininks, Robert H.; Woodcock, Richard W.; Weatherman, Richard F.; & Hill, Bradley K. (1984).

<u>Scales of independent behavior</u> (Woodcock-Johnson Psycho-Educational Battery. Part Four). Allen, TX: DLM Teaching Resources.

behavioral analysis / behavior identification / Scales of Independent Behavior (SIB)

The SIB is a wide age range, comprehensive set of tests for measuring functional independence in motor development, social development, language, self-help, and community adaptation. The tests are individually administered through a structured interview, and norms are provided from the infant level to the mature adult level. SIB includes 14 subscales of developmental and social independence, a short form scale, an early development scale, and a measure of problem behaviors. Specific directions for administering each scale are provided page-by-page in this test book.

Bruininks, Robert H.; Woodcock, Richard W.; Weatherman, Richard F.; & Hill, Bradley, K. (1984).

Interviewer's manual. Scales of independent behavior
(Woodcock-Johnson Psycho-Educational Battery. Part Four). Allen,
TX: DLM Teaching Resources.

Scales of Independent Behavior (SIB) / behavior analysis / behavior identification

This interviewer's manual contains six major sections. The first section, Organization and Content, describes the content and design of the SIB. The second section, General Directions for Administration, presents instructions for interviewer training and preparation for interviewing. The third section presents specific instructions for administering and scoring the SIB. This section should be read carefully and the recommendations followed before any part of the SIB is administered. The fourth section, Test Interpretation, describes the various options for using the test

information and provides detailed information for completing the Summary of Scores and the profiles in the Response Booklet. Practice exercises and keys to the correct completion of those exercises are provided in the fifth section, Interviewer Review and Practice Exercises. The norm tables are contained in the final section.

A longitudinal study of graduates of special education.

Interchange, 8(2), 3-5. Champaign, IL: The Secondary Transition Intervention Effectiveness Institute. University of Illinois.

follow-up studies / special education / Washington

This current study in Washington involves the collection of data on former students at standard time intervals and the addition of a contrast group of nonhandicapped students who graduated from the same public schools at the same time as the special education students. The design of the study enabled the authors to evaluate outcomes by disability type, over time, and to compare the results with those of a nonhandicapped cohort. The data presented here represent interim results of this study.

278. Whitman, Thomas L.; Spence, Brenda H.; & Maxwell, Scott (1987).

A comparison of external and self-instructional teaching formats with mentally retarded adults in a vocational training setting. Research in Developmental Disabilities, 8(3), 371-388.

vocational training / self-control training / generalization

A theory recently proposed by Whitman postulates that self-instructional training procedures should have special utility for low ability individuals. Although past studies have shown that self-instructional training programs can be employed to improve the performance of mentally retarded individuals in work situations, research has not examined whether this training format is superior to external instruction. To test Whitman's theory, mentally retarded adults were taught to perform a complex sequencing task through one of two training formats: self-instruction or external Performance was evaluated through the examination of instruction. accuracy measures obtained during training, maintenance, and generalization assessments. Results indicated that participants receiving self-instructional training were able to achieve and sustain a higher level of performance than participants receiving external instruction. While self-instructionally trained subjects also showed superior performance on the generalization assessment, these results were not statistically significant. analyses revealed that higher ability participants, self-instructionally trained participants, and participants who reached criterion on the training and generalization tasks self-verbalized more frequently during the various assessments. Ιn contrast to prediction, there was no significant difference in length of time required to train individuals in the two instructional groups.

Navin, Sally L.; & Myers, Jane E. (1983).

A model of career development for disabled adults. <u>Journal of Applied Rehabilitation Counseling</u>, <u>14</u>(2), 38-43.

job placement / career guidance / model programs / rehabilitation counseling

While the definitions of job placement constitute a broad range there is considerable agreement on the fact that it is an integral part of the rehabilitation process. This article extends the concept of placement to a theory of career counseling for disabled adults. A review of the history of placement in rehabilitation and a consideration of several theories of career are offered. Following a discussion of a model of career development for

disabled adults with components of self-understanding, self-acceptance including acceptance of disability, career exploration, career self-concept, career selection and career reevaluation, are implications for rehabilitation counselors.

280. Storey, Keith; & Gaylord-Ross, Rober (1987).

Increasing positive social interactions by handicapped individuals during a recreational activity using a multicomponent treatment package. Research in Developmental Disabilities, 8(4), 627-649.

social skills / self-control training / work environment

A multicomponent treatment package increased the rate of positive statements among handicapped youth during a social/leisure activity at a work training setting. The package of role playing, graphic feedback, contingent reinforcement, and self-monitoring was directly replicated across three experiments in producing normative rates of positive verbal statements. There was no evidence of generalization to other stimulus activities. There was limited response generalization to a class of negative verbal statements. The study further examined the critical components of the maintenance package through a withdrawal design. It was found that contingent reinforcement and self-monitoring could maintain substantial rates of positive behaviors. In the third experiment it was further demonstrated that self-monitoring alone could maintain positive statements in three of the four students in the group.

281. Lovett, David L.; & Harris, Mary B. (1987).

Important skills for adults with mental retardation: The client's point of view. Mental Retardation, 25(6), 351-356.

social skills / vocational training / independent living / community integration

The present study was conducted to determine whether adults with mental retardation could provide useful information about what skills they considered important for successful community living and whether these skills would correspond to those previously rated as important by persons who had significant contact with such individuals (Lovett & Harris, in press). Adults with mild to moderate retardation (N=48) living in a large Southwestern city were interviewed. Vocational and social skills were rated as most important, followed by personal, academic, and leisure skills, a

ranking similar to that by the significant others in the previous study. Imprications for training community living skills were discussed.

Seyfarth, John; Hill, Janet W.; Orelove, Fred; McMillan, James; & Wehman, Paul (1987).

Factors influencing parents' vocational aspirations for their children with mental retardation. <u>Mental Retardation</u>, <u>25</u>(6), 357-362.

parent involvement / attitudes / vocational training

A measure of parents' vocational aspirations for their children with mental retardation was developed, and relationships between aspirations and other factors were examined. A 32-item Likert-type questionnaire was railed to 660 members of a stratified random sample of parents and guardians of persons with mental retardation who were identified from files maintained by community services agencies; 233 parents responded. Data were analyzed using multiple regression, with the vocational aspiration score serving as a dependent variable. The equation accounted for 26% of the variance. Significant factors were parents' attitudes toward work as a normal part of life, child's age, and child's developmental level.

A conceptual framework and process for identifying the inservice needs of vocational educators serving special needs populations [Pilot test report]. St. Paul, MN: Minnesota Research and Development Center for Vocational Education, Department of Vocational and Technical Education, University of Minnesota.

personnel preparation / vocational special needs education / Minnesota

This study was initiated as an effort to identify additional skills and knowledge needed by vocational education teachers, coordinators, program supervisors/managers, and administrators in Minnesota in order to better prepare them to serve special needs students. The specific study objectives were to:

1) Conduct a review and synthesis of the literature.

2) Develop a conceptual framework within which to consider the special skills and knowledge required when teaching mainstreamed special needs students.

B) Develop a process for assessing the skills and knowledge of

educators.

4) Pilot test the assessment process. References are included.

A model to prepare vocational educators and support services personnel in curriculum-based assessment. <u>Interchange</u>, <u>7</u>(4), 2-6. Champaign, IL: The Secondary Transition Intervention Effectiveness Institute. University of Illinois.

personnel preparation / model programs / vocational educational special needs personnel / curriculum

This article describes a federally funded personnel preparation project whose goal is to develop a comprehensive set of materials to train regular and vocational special needs educators in a curriculum-based assessment and planning model. The major components of this model are presented along with a description of how the model will be refined and field-tested in pre-service and in-service settings.

293. Lagomarcino, Thomas R.; & Rusch, Frank R. (1987).

Supported employment: Transition from school to work.

<u>Interchange</u>, 8(1), 1-4. Champaign, IL: The Secondary Transition Intervention Effectiveness Institute. University of Illinois.

supported work / curriculum / vocational training / special
education

Transition is explained in light of supported employment as an appropriate and meaningful goal for special education students because it emphasizes earning wages in integrated work settings, with guaranteed ongoing support. References are included.

294. Bennett, Randy Elliot; & Ragosta, Marjorie (1985).

Technical characteristics of postsecondary admissions tests for handicapped examinees: A review of research. <u>Journal of Special Education</u>, 19(3), 255-267.

post-secondary education / admissions studies

This paper reviews the research on the technical adequacy of postsecondary admissions tests for handicapped examinees. First, the performance of disabled students relative to the general population is explored. Of the four disability groups discussed, the admissions test performance of learning-disabled students and of hearing impaired students appears most discrepant from the general test-taking population. Evidence relating to the validity and reliability of admissions tests for handicapped and nondisabled examinees is reviewed next. The results of this review suggest no dependable differences in validity or reliability across these populations. However, because the data on which this conclusion is based are so limited, further research is needed before the technical characteristics of admissions tests for handicapped examinees can be fully evaluated.

295. Schloss, Patrick J.; & Schloss, Cynthia N. (1985).

Contemporary issues in social skills research with mentally retarded persons. <u>Journal of Special Education</u>, <u>19</u>(3), 269-282.

social skills / research synthesis

There is consistent evidence that a majority of mildly and moderately mentally retarded persons adjust to community environments upon leaving school. Mental age and academic

achievement appear not to have a significant influence on adjustment. Other features, including interpersonal skills and social competence do have a strong bearing on community adjustment. In view of this, numerous studies over the past two decades have been conducted to evaluate social skill enhancement strategies. Unfortunately, there are serious limitations to this literature. Specifically, (a) the absence of a conceptual base has resulted in the failure of research to build a comprehensive body of knowledge; (b) training priorities have not been matched to learner characteristics or needs; (c) the social significance of program effects has generally been ignored; (d) independent and dependent variables have not been evaluated and applied with equal precision; (e) investigators seldom evaluate the generality of effects to other settings, responses, and time; and finally (f) research has not demonstrated that community integration and adjustment can be enhanced through training.

296.

Cook, Stephen B.; Scruggs, Thomas E.; Mastropieri, Margo A.; & Casto, Glendon C. (1985-86).

Handicapped students as tutors. <u>Journal of Special Education</u>, 19(4), 483-492.

meta analysis / peer involvement / tutors

A meta-analysis was conducted on available research documenting effectiveness of handicapped students as tutors of other students. Nineteen articles yielding 74 effect sizes were located. Results indicated that (a) tutoring programs were generally effective; (b) tutees generally gained more than tutors; and (c) tutor and tutee gains on self-concept and sociometric ratings were small, while gains on attitude measures were larger. Implications for instruction and further research are given.

297.

Cardoza, Desdemona; & Rueda, Robert (1986).

Educational and occupational outcomes of Hispanic learning-disabled high school students. <u>Journal of Special Education</u>, <u>20</u>(1), 111-126.

Hispanics / learning disabilities / educational outcomes / follow-up studies

The purpose of this study was to examine the educational characteristics of six subgroups in the high school and beyond data set. These included senior learning-disabled Hispanic students, senior learning-disabled Anglo students, and a randomly selected

Anglo senior nonhandicapped subsample. In addition, three parallel

sophomore groups were included.

The major analyses of the data reflected an attempt to compare the groups in terms of their course taking behavior, educational aspirations and educational/occupational outcomes. The results indicated that there were significant differences between the handicapped and nonhandicapped groups. However, in general, there were no differences between the Anglo and Hispanic handicapped groups.

298. Wang, Margaret C.; & Baker, Edward T. (1985-86).

Mainstreaming programs: Design features and effects. <u>Journal of Special Education</u>, <u>19</u>(4), 503-521.

mainstreaming / meta analysis

The goal of this study was to review and analyze the design features and efficacy of mainstreaming as an educational approach to serving disabled students. Based on a predetermined set of criteria, 11 empirical studies of the effects of mainstreaming published from 1975 through early 1984 were selected for analysis from a total pool of 264 studies. Meta-analysis was the technique used to perform a quantitative synthesis of findings from the studies.

Among the notable findings was that mainstreamed disabled students consistently outperformed nonmainstreamed students with comparable special education classifications. In addition, selected design features, found in the extant effective-teaching literature to be associated with programs designed to provide for student differences, were also found to be features of mainstreaming programs that showed greater proportions of positive than of negative outcomes.

299. Staats, Thomas E.; & Hendler, Nelson (1984).

Occupational and psychosocial stressors as related to health problems: Implications for the rehabilitation counseling process. <u>Journal of Applied Rehabilitation Counseling</u>, <u>15(4)</u>, 23-26, 56.

stress management / rehabilitation counseling

A review of current literature on stress and the disabled is discussed, comparing the commonality and uniqueness of their stressors to those of non-handicapped individuals. A predictive analysis of concurrent mental and physical health problems utilizing the Stress Vector Analysis-R test battery indicated that

an index of personal (psychosocial) stressor strength was superior to an index of occupational stressor strength in predicting stress-related health problems that could influence rehabilitation, productivity, and/or work attendance. Emphasis should be placed on diagnosing and treating the problems of the "person" (psychosocial counseling), not just those of the "worker" (vocational counseling) in the client to optimize health and productivity both in the work place and at home. This supports previous assertions in the rehabilitation literature that rehabilitation workers should adopt the stress evaluation and stress management training roles as an integral part of the rehabilitation counseling process with their clients.

300. Krishnaswami, Uma (1984).

Learning to achieve: Rehabilitation counseling & the learning disabled adult. <u>Journal of Applied Rehabilitation Counseling</u>, <u>15(4)</u>, 18-22.

rehabilitation counseling / learning disabilities

A whole generation of identified learning disabled children has grown to adulthood and is in need of rehabilitation services. Their problems extend beyond their specific learning disabilities to the areas of social development, self-concept, and interpersonal functioning. Functional aspects of learning disabilities are enumerated here, and psychosocial implications discussed. This article presents the need to adapt rehabilitation planning to better serve the learning disabled consumer, and outlines some adaptations of strategies for the rehabilitation counselor with this special population.

Employment Training and Transition Project: Final report.
Olympia, WA: Office of Superintendent of Public Instruction and University of Oregon. (Comp. No. 84.023D - OSERS File No. 17)

final report / Washington / interagency cooperation / secondary education

This final report is comprised of several sections that give an overview of the Employment Training and Transition Project, including a discussion of issues relevant to the development of the project, project methods, project results, and the implications for future program and policy development. References and appendixes are included.

302. Howell, Joanne C. (1983).

Differences between public and private rehabilitation services and the processionals who staff them. <u>Journal of Applied</u> <u>Rehabilitation Counseling</u>, <u>14</u>(2), 17-22.

rehabilitation counseling / employment incentives

Historically master's level programs in rehabilitation counseling produced trained graduates, many of whom became employed in state Divisions of Vocational Rehabilitation. In recent years an increased number of these experienced public sector counselors have switched from public to private sector employment which offers better salary incentives, training opportunities, smaller Some difficulty caseloads, and a new sense of professional esteem. in job adjustment was reported by the seven counselors interviewed because of the differing philosophies and practices found in private rehabilitation companies. Despite these detriments, the trend away from the public sector is expected to continue as government budgetary cutbacks progress. Public agencies may need to develop and re-emphasize employment incentives to stall the exodus of trained counselors from the public to private sector of rehabilitation.

303. Garvin, Richard E. (1983).

Industrial relations: A service-oriented approach to job development. <u>Journal of Applied Rehabilitation Counseling</u>, <u>14(2)</u>, 44-46, 50.

Kentucky / vocational rehabilitation / business and industry

This paper reviews the industrial relations program of the Kentucky Bureau of Vocational Rehabilitation. This program represents a service-oriented approach to job development. It is based on the premise that the primary goal of vocational rehabilitation is to get work-ready individuals with handicaps into appropriate employment. To achieve this goal, the backing and support of business and industry is needed. One effective means of obtaining and maintaining this support is through the provision of essential cost-free services to the business community.

This paper reviews the factors and assumptions that lead to the development of this program and discusses the cost-free consultant/educational and direct services offered to business and industry through the Industrial Relations Manager. Through this service-oriented program of job development, Kentucky Vocational Rehabilitation has been able to: (a) develop and maintain an excellent working relationship with business and industry across the state, (b) provide meaningful and cost-beneficial services that

were not being provided by another state agency or organization, (c) breakdown many of the man-made barriers to successful employment of individuals with handicaps, (d) provide exceptional follow-along services, and (e) increase the rehabilitation success rate.

The family: A potential resource in the provision of rehabilitation services. <u>Journal of Applied Rehabilitation</u> Counseling, 16(2), 52-53.

family involvement, vocational rehabilitation

This article points out that families can be valuable partners in the vocational rehabilitation of a person who is handicapped. The article documents that family services have not, however, been provided by rehabilitation counselors even though such services are encouraged by law. Reasons for the lack of family services, including the complexity of the topic and contradictory research findings, are reviewed. Implications for research and resources for practitioners are given.

306. Roessler, Richard T. (1985).

Self-starting in the job market: The continuing need for job seeking skills training in rehabilitation. <u>Journal of Applied Rehabilitation Counseling</u>, <u>16</u>(2), 22-75, 30.

vocational rehabilitation / job seeking skills

Job seeking skills training is a critical rehabilitation service for individuals capable of independently locating work. Unfortunately too few clients receive this training. As a result, many lack the skills needed to reenter the labor market on their own initiative. After discussing essential components of job seeking skills training programs, this article presents two training programs currently being demonstrated in rehabilitation settings.

Jobs obtained by spinal cord injured rehabilitants: Implications for job placement practices. <u>Journal of Applied Rehabilitation</u> <u>Counseling</u>, <u>16(2)</u>, 48-51.

spinal cord injuries / job placement

The purpose of this article is to analyze the jobs obtained by a large sample of spinal cord injured rehabilitants, relate these findings to earlier literature on vocational issues, and generate a list of useful suggestions for rehabilitation counselors involved with job placement for this special population.

308. Pratzner, Frank C.; & Russell, Jill Frymier (1984).

The changing workplace: Implications of quality of work life for vocational education. Columbus, OH: The National Center for Research in Vocational Education.

quality of work life (QWL) / vocational education

This report describes the purpose of a project to examine quality of work life (QWL) developments in the American workplace in order to identify what, if any, implications they have for vocational education. This was accomplished primarily through literature reviews, with subsequent visits to firms identified as being leaders in the implementation of QWL activities. Interviews and observations were then conducted at nine selected firms to verify and further clarify potential implications of QWL developments for vocational education. References are included.

How to establish competency model programs for the delivery of vocational services to the severely multihandicapped. Austin, TX: Lippmann/Porter.

model programs / vocational training / Goodwill Rehabilitation Services / Competency Model Program (CMP)

This manual was written for Goodwill Rehabilitation Services, San Antonio, Texas, in response to their need to establish a vocational training program responsive to multi-levels of handicaps, particularly the mentally retarded and severely handicapped. The Competency Model Program (CMP) which was developed is described step by step along with evaluation procedures and an activities program.

310. Dickerson, Martha Ufford (1982).

New challenges for parents of the mentally retarded in the 1980s. The Exceptional Child, 29(1), 5-12.

parent involvement / social skills / independent living

This article discusses the following challenges of parenting mentally retarded children: (a) dare to raise adults, not children; (b) resist limiting the individual because of labels that result from the evaluation, (c) discuss the child's retardation openly with him/her, (d) celebrate the child's emerging sexuality, (e) discuss the child's sexuality, (f) use respite services to promote growth and development, (g) accept recommendations for treatment, (h) anticipate the child's separation from home, (i) resist the tendency to provide unnecessary guardianship, and (j) confirm the child's right to maturity.

311. Walls, Debra A. (1983).

Placement: Rehabilitation's asset to industry. <u>Journal of Applied Rehabilitation Counseling</u>, <u>14</u>(2), 47-50.

job placement / barriers / business and industry

With placement of disabled clients into competitive employment at the forefront of rehabilitation services, maximizing placement sources within the industrial setting is essential. Several barriers to employment are presented which challenge the vocational

rehabilitation counselor. The importance of client training which will prepare a client for promotional opportunities is suggested for overcoming placement barriers. Finally, a systems-selling approach is investigated along with ways in which counselors can establish themselves as consultants with industry.

Technology for persons with severe disabilities: Practical and ethical considerations. <u>Journal of Special Education</u>, <u>21</u>(3), 122-132.

technology / independent living

Technological advances relevant to the needs of persons with severe handicaps are emerging at a rapid rate. These devices and adaptations have significant potential for enhancing opportunities for integration, independence, and personal choice for this group of individuals. This article discusses several critical issues related to the use of technology: (a) obstacles to the use of adaptations and technological devices, (b) strategies for the selection, design, and use of adaptations and technological devices, and (c) an approach for incorporating technology into the integrated team planning process. Consideration is given to ethical and philosophical issues that must guide the application of new technological advances.

<u>Proceedings of the Second International Seminar on Vocational Rehabilitation for Mentally Retarded Persons</u>. Washington, DC: American Association on Mental Deficiency in cooperation with the Rehabilitation Services Administration, U.S. Department of Health, Education and Welfare.

vocational rehabilitation / attitudes / sheltered workshops / model programs

This publication contains papers presented and recommendations formulated at the Second International Seminar on Vocational Rehabilitation for Mentally Retarded Persons held August 8-29, 1976, in the United States. The latest advances in the field were discussed by representatives from 25 foreign countries who are actively involved in rehabilitation research or who work in areas closely related as investigators, administrators, or trainers of rehabilitation workers. Topics discussed included the conduct of research, innovative programming emphasizing the normalization concept, training of personnel, and the evaluation and assessment of programs.

Also included are information resources and technical assistance for employers and the disabled, as well as a list of free federal publications.

315. Steinberg, Margaret A. (1983).

Parental concerns and priorities in the education of disabled students. The Exceptional Child, 30(1), 77-85.

parent involvement / attitudes / special education / Australia

During a conference organized as part of I.Y.D.P. [International Year of Disabled Persons], parents of the disabled from throughout Queensland attempted to identify the primary needs they experienced in coping with a disabled child in the family. Recommendations were made concerning the provision of services which would help to alleviate these needs. Issues and recommendations concerning education, including educational rights, legislative and financial considerations, teacher education, and the adequacy of educational services, are discussed in this paper. The dearth of a range of appropriate post-school options was of crucial import; provision of continuing education services for disabled school leavers, including minimally handicapped students integrated into regular classes, is seen as an urgent requirement. Co-operative planning and service provision should be given priority status by special education authorities, tertiary institutions and employment departments and agencies.

Appendixes include a directory of software publishers and distributors as well as a listing of special programs designed for specific disability and interest areas.

319. Hill, Mark; & Wehman, Paul (1983).

Cost benefit analysis of placing moderately and severely handicapped individuals into competitive employment. <u>Journal of the Association for the Severely Handicapped</u>, 8(1), 30-38.

competitive employment / cost effectiveness / Project Employability

This paper presents an analysis of costs incurred and tax monies saved, over approximately four years, through the successful implementation of an orgoing job training and placement program.

The focus of the analysis is on the amount of money saved rather than on the wages earned by moderately and severely handicapped workers. Factors in the cost analysis include number of months the client had been working, amount of staff hours expended on tha client at the job site, amount of funds expended proportionately on each Client, Supplemental Social Security Income saved, estimated cost of day programming for the client if no job placement had been made, Targeted Job Tax Credit Program costs, and amount of state and federal taxes withheld. After almost four years, the public's cumulative savings totaled \$620,576, while expenditures totaled \$530,300. Thus, the total direct financial benefit to taxpayers is \$90,376. Since initiation of the program, the clients' cumulative earnings are over \$500,000.

<u>Using program theory in evaluation</u>. (New Directions for Program Evaluation. A publication of the American Evaluation Association.) San Francisco, CA: Jossey-Bass Inc., Publishers.

program evaluation / program theory

This volume describes the need for program theory in planning and conducting evaluations and provides a variety of approaches for understanding and measuring program theory. References and subject index are included.

332. Williams, David D. (Ed.) (1986).

Naturalistic evaluation. (New Directions for Program Evaluation. A publication of the American Evaluation Association.)
San Francisco, CA: Jossey-Bass, Inc., Publishers.

naturalistic evaluation / program evaluation

The contributors to ihis volume represent both the theorists who advocate naturalistic approaches to evaluation and the practitioners who conduct naturalistic evaluations. Analyses of their experiences can facilitate other evaluators and recipients of evaluations in understanding how naturalistic methods and evaluation purposes complement and conflict with one another. References and a subject index are included.

333. Boruch, Robert F.; & Pearson, Robert W. (1988).

Assessing the quality of longitudinal surveys. <u>Evaluation Review</u>, 12(1), 3-58.

follow-up studies / program evaluation

A growing concern has emerged in recent years about the use of relatively large national longitudinal surveys. This concern arises in part from a heightened sensitivity to the diminished support for new data-collection programs across the U.S. federal statistical system and the increasing competition throughout the research and policy communities for what have undoubtedly always been scarce resources for research. Despite this concern, there have yet to be developed tools for evaluating the relative or comparative value of longitudinal surveys and criteria by which more intelligent decisions can be made with respect to whether an ongoing survey should be continued or terminated. This article

argues that criteria are unlikely to be developed for evaluating whether one longitudinal survey is "better" than another, but that one can assess the quality and usefulness of a particular survey, and suggests specific guidelines for such assessments.

334. Danley, Kuren S.; & Mellen, Vera (1987).

Training and personnel issues for supported employment programs which serve persons who are severely mentally ill. <u>Psychosocial</u> <u>Rehabilitation Journal</u>, <u>11</u>(2), 87-102.

supported work / psychiatrically disabled / vocational training

This article presents current thinking regarding the training required to prepare persons to provide effective supported employment services for persons with a psychiatric disability. Content information was obtained by reviewing existing literature on supported work as well as relevant literature in the field of psychiatric rehabilitation. In addition to literature resources, personal contacts were made with experts in the fields of mental health and rehabilitation. Directions are suggested for training supported employment personnel to provide services to persons with a psychiatric disability.

335. Bond, Gary (1987).

Supported work as a modification of the transitional employment model for clients with psychiatric disabilities. <u>Psychosocial</u> <u>Rehabilitation Journal</u>, <u>11</u>(2), 55-73.

supported work / psychiatrically disabled / vocational
rehabilitation

Historically, vocational rehabilitation for persons with psychiatric disabilities has been ignored, and their employment prospects regarded as poor. The supported work model, developed for clients with mental retardation, is similar to the "transitional employment" model adopted by many psychiatric rehabilitation programs. This paper compares the two models, summarizes the vocational research for clients with psychiatric disabilities, and discusses features of the supported work model that might be adapted so as to correct some of the drawbacks of the transitional employment model. A program that recently experimented with a modified transitional employment placement is described.

336. Noble, John H., Jr.; & Collignon, Frederick C. (1987).

Systems barriers to supported employment for persons with chronic mental illness. Psychosocial Rehabilitation Journal, 11(2), 25-44.

supported work / psychiatrically disabled / barriers

This article describes the differing histories, cultures, and political constraints of the vocational rehabilitation and mental health service systems that may cause conflicts and systems barriers to expansion of supported employment opportunities to persons with chronic mental illness. The unpredictable course that chronic mental illness follows among affected individuals will challenge the capacities of vocational rehabilitation counselors and mental health practitioners to sustain joint ventures.

337. Collignon, Frederick C.; Noble, John H., Jr.; & Toms-Barker, Linda (1987).

Early lessons from the Marion County demonstration in integrating vocational and mental health services. <u>Psychosocial Rehabilitation Journal</u>, 11(2), 75-85.

program development / vocational rehabilitation / psychiatrically
disabled

This article describes the principal lesson to be learned from an initial design and implementation of a large city-wide demonstration in Marion County, California, in setting up new programs and services for mental health and vocational rehabilitation of individuals with chronic mental inlness. The article stresses the initial overestimate of need, problems in coordination, choice of vendors, and setting up of appropriate performance expectation for vocational rehabilitation with their population.

338. Isbister, Fred; & Donaldson, Gary (1987).

Supported employment for individuals who are mentally ill: Program development. Psychosocial Rehabilitation Journal, 11(2), 45-54.

supported work / psychiatrically disabled / program development

Supported employment programs for individuals with psychiatric disability have taken seed across the country and the authors of this paper present concepts gleaned from their personal involvement

with the development of such programs. The authors also discuss in detail supported employment program components, needs, and areas of consideration.

339. Anthony, William A.; & Blanch, Andrea (1987).

Supported employment for persons who are psychiatrically disabled: An historical and conceptual perspective. <u>Psychosocial</u> <u>Rehabilitation Journal</u>, <u>11</u>(2), 5-23.

supported work / psychiatrically disabled / federal legislation

This article overviews the conceptual and legislative development of supported employment with persons who are developmentally disabled. The model of supported employment for psychiatrically disabled persons that is currently emerging reflects this conceptual and legislative history. Based on a literature review and interviews with persons in the field, this article destribes how the suppported employment approach is currently being adapted for persons with a psychiatric disability. Other conceptual issues which must be articulated in order for the field to grow are highlighted.

340. Tindall, Lloyd W.; & Gugerty, John J. (1983).

Effective microcomputer assisted instruction for the vocational education of special needs students. Madison, WI: Vocational Studies Center, School of Education, University of Wisconsin-Madison.

vocational education / special education / microcomputers

This manual, Effective microcomputer assisted instruction for the vocational education of special needs students, has been designed to help teachers utilize the microcomputer in the education of handicapped and disadvantaged students. Microcomputer programs listed in Part I of this manual have been successfully utilized by practitioners in the instruction of special needs students. Some of the programs were developed by commercial publishers and others are the results of the efforts of individual teachers seeking to improve instruction with the assistance of the microcomputer. A number of microcomputer assisted programs used in the instruction of "regular students" are included with the idea that such programs may also be relevant for use with special needs students. The microcomupter programs have been obtained through the cooperation of many persons from around the nation.

Articles found in Part II of this manual provide ideas on the educational uses of the microcomputer. Authors discuss how they

use microcomputers in resource rooms and centers, occupational information centers, linkage projects, education exchanges, and computer-related vocational education for disadvantaged students. A software evaluation process using students to try out a given program is described and a vocational technical school provided its software evaluation form.

341. Emener, William G.; & Spector, Paul E. (1985).

Rehabilitation case management: An empirical investigation of selected rehabilitation counselor job skills. <u>Journal of Applied Rehabilitation Counseling</u>, <u>16</u>(2), 11-21, 30.

program development / rehabilitation counseling / job analysis

This study describes the results of a national survey that focused on the (a) importance, (b) difficulty of learning, and (c) recommended learning modality of 30 rehabilitation counselor case management job skills. Subjects were 492 certified rehabilitation counselors who were listed in the Fall, 1983, Commission on Rehabilitation Counselor Certification roster. Factor analysis of items asking to what extent each skill was a part of a rehabilitation counselor's job yielded six factors: working with clients, planning, working with others on clients' behalf, making judgments, working with professionals, and synthesizing and processing information. Most of the 30 skills were rated as approximately equivalent in difficulty of learning. "During service" (i.e., on the job with supervision) was rated most often as the most preferred modality for learning these skills and "Inservice" (i.e., formal continuing education) was rated as least preferred. Implications for professional training, development, and practice are discussed.

342. Gaylord-Ross, Robert (Ed.) (1988).

<u>Vocational education for persons with handicaps</u>. Mountain View, CA: Mayfield Publishing Co.

vocational education / program development / interagency cooperation / personnel preparation / federal legislation / vocational training / work environment

This book describes the multifaceted process of career preparation for persons with handicaps. The field is diverse and encompasses information and methods from teaching, business, counseling, administration, psychology, and economics. The contributors to this volume provide state-of-the-art information about the practice of vocational special education. This book will serve as a text

for the student in training as well as a resource for the practitioner in the field. Emphasis is on describing effective vocational programs as well as current research and policy. Each chapter offers case studies that illustrate and clarify the authors' main points. A number of topics, sucy as legislation, are covered in more then one chapter. The unique perspective that each author brings to these topics will help the reader understand the many sides of each topic. References are included throughout and a subject index is provided.

<u>Proceedings of the Second Annual Conference: "Computer Technology/Special Education/Rehabilitation"</u> (California State University, Northridge, October 16-18, 1986). Northridge, CA: California State University, Office of Disabled Students.

special education / vocational rehabilitation / microcomputers

This document contains the proceedings of 25 presentations at the Second Annual Conference on Computer Technology, Special Education, and Rehabilitation. Some of the topics included are computer access for the visually impaired, laserdisc technology, writing labs, computer programs for vocational education, software analysis, etc. References are included with some of these contributed papers.

344. Voeltz, Luanna M.; & Evans, Ian M. (1983).

Educational validity: Procedures to evaluate outcomes in programs for severely handicapped learners. <u>Journal of the Association for the Severely Handicapped</u>, <u>8</u>(1), 3-15.

program evaluation / educational outcomes / special education /
behavioral analysis

Documentation of positive outcomes for severely handicapped learners as a function of their educational programs is receiving increased attention as the major focus of program development, monitoring, and evaluation efforts. At the same time, those strategies that have been used predominantly to determine program effectiveness -- particularly single-subject experimental designs and developmentally based assessments -- are being challenged as inadequate methods for accomplishing this task. This paper outlines existing concerns and argues for the general evaluative concept of educational validity. Suggestions are provided for measuring the three criteria that are essential components of

.57 147

educational validity. Also emphasized is the professional's obligation to advocate on behalf of program needs based upon knowledge and professional judgment.

Guidelines for assessing job-related social skills of mildly handicapped students. <u>Career Development for Exceptional Individuals</u>, 9(2), 89-97.

social skills / work environment / evaluation

This article describes assessment procedures related to job-related social competence for mildly handicapped people. Toward this end two areas are discussed. First, a theoretical foundation for examining job-related social skills is presented. Next, examples of assessment approaches reflecting the different aspects of the model are reviewed. In summary, implications for practice and research are drawn. References are included.

352. Weicker, Lowell P., Jr. (1987).

A look at policy and its effect on special education and vocational rehabilitation services. <u>Career Development for Exceptional Individuals</u>, 10(1), 6-9.

Educational of All Handicapped Children Act PL 94-142 / policy research / interagency cooperation

Senator Weiker discusses federal legislation effects on special education, vocational rehabilitation services, and transitional services. He concludes with an emphasis on business and industry's responsibility to see that young people with disabilities continue their educational development into adulthood. He stresses partnerships among schools, businesses, and federal, state and

• (

local governments as critical in ensuring that disabled individuals have the range of services and opportunities necessary to assist them in being independent, productive, and fully integrated into the mainstream of society.

353. Cobb, Brian; & Hasazi, Susan Brody (1987).

School-aged transition services: Options for adolescents with mild handicaps. Career Development for Exceptional Individuals, 10(1), 15-23.

job placement / program development / secondary education / transition

This paper focuses on those programs and services at the high school level that can meet the transitional service(s) needs for mildly handicapped students. Particularly important for these programs is the inclusion as part of their curricula employment placement or postsecondary education placement outcomes as well as academic achievement outcomes. Eight exemplary program elements are presented and appear to best support the transitional service needs of mildly handicapped school-age students. References are included.

354. Vandercook, Terri (1987).

The school administrator's role in providing vocational community-based programming for students with severe mental disabilities. Career Development for Exceptional Individuals, 10(1), 24-32.

vocation | curriculum | program development | school administrators

This paper examines current vocational education practices and general curriculum issues related to the education of students with severe disabilities, describes a model program for providing successful vocational programs, and makes recommendation for ways in which administrators can facilitate the development of programs.

355. White, Stephen (1987).

Least restrictive employment: The challenge to special education. Career Development for Exceptional Individuals, 10(1), 33-41.

special education / vocational training / least restrictive
environment

This paper describes two training models to illustrate how least restrictive employment can be implemented for disabled students with a variety of abilities. The vocational skills training model prepares those students who are likely to become competitively employed for locally referenced entry-level occupations, while the high visibility low-incidence model is designed for severely disabled students who are unlikely to become competitively employed. These models are presented as a foundation for a secondary special education program that has as its goal least restrictive employment with maximum opportunity for career advancement, job security, and job satisfaction for each student. References are included.

Marketing supported employment [Special Issue]. <u>Avant Garde</u> (A quarterly newsletter). Denver, CO: Author.

supported work / marketing / Colorado / attitudes

This special issue of <u>Avant Garde</u> is devoted to the strategies involved in marketing supported employment services to prospective employers and businesses.

358. Berkell, Dianne E. (1987).

Vocational assessment of students with severe handicaps: A review of the literature. Career Development for Exceptional Individuals, 10(2), 61-75.

vocational evaluation / literature review / vocational rehabilitation

This article, through an examination of the literature, presents an overview of the current state of the art of vocational assessment for people with severe handicaps. Student abilities that are typically evaluated are discussed, along with descriptions of the various procedures traditionally used to obtain evaluation information in these areas. The need for the development of assessment strategies that are designed to assist students in succeeding in job training programs rather than traditional instruments that identify student deficits, thereby limiting access to training opportunities, is recommended. References are included.

359. Dick, Marlene A. (1987).

Translating vocational assessment into transition objectives and instruction. <u>Career Development for Exceptional Individuals</u>, 10(2), 76-84.

vocational evaluation / career guidance / Miss uri / individualized education program (IEP) / model programs

This article describes (1) the critical role of vocational assessment in providing appropriate career programming for students with special needs, and (2) a process developed by a consortium formed in Kansas City in 1984 which systematically translated vocational assessment results into LEP objectives and instruction for transition. Three concerns that may often arise in schools implementing vocational assessment are addressed: (a) providing appropriate vocational assessment to all (b) adequate use of assessment results, and (c) inclusion of transition objectives and instruction. References are included.

The successfull employer worker with a handicap: Employee/employer perceptions of job performance. <u>Career Development for Exceptional Individuals</u>, 10(2), 85-94.

employer involvement / attitudes / social skills / job retention /
work behavior

Successful employment of individuals with handicaps has received considerable attention in recent years, especially with regard to the transition from school to the world of work. Certain skills

may be critical not only for the transition process but also for continued employment. Agreement between employees and their employers as to the presence or absence of certain skills in the work setting might facilitate a successful work experience. The purpose of this study was to examine whether there are differences between successfully employed workers with handicaps and their employers with regard to the existence or demonstration of learning, work habit, and independence behaviors in the work place. References are included.

361. Glascoe, Frances P.; & Levy, Sidney M. (1987).

The work behavior of employees with and without handicaps. <u>Career</u> <u>Development for Exceptional Individuals</u>, <u>10</u>(2), 95-106.

social skills / job retention / vocational training / work behavior

The purpose of this article is to characterize the work and work-related social behaviors of workers without handicaps and to view the similarities and differences between workers with and without handicaps. The significance of this characterization is that it validly and empirically defines desirable vocational behaviors. The findings should be useful in setting instructional objectives and in making placement decisions for students and employees with handicaps.

Research on professional rehabilitation competencies [Special issue]. <u>Kehabilitation Counseling Bulletin</u>, 31(2).

job satisfaction / rehabilitation counseling / professional competencies

This special issue of research reports addresses the importance and attainment of competencies for rehabilitation practitioners. The information presented was derived from national studies conducted at the University of Wisconsin-Madison through a grant from the National Institute on Disability and Rehabilitation Research to the Ne' ona' Council on Rehabilitation Education. The three-year ed project (through 9/87) is the first empirically ' sed effort imultaneously investigate the three major specializations abilitation counselors, vocational evaluators, and job p.acement specialists) across three primary employment settings (public, private non-profit, and private for-profit). The findings have implications useful to professional workers concerned with self-development, to supervisors and administrators interested in improving selection and utilization of personnel, and to federal officials responsible for planning research and training programs. Moreover, these studies provide an empirical basis for constructing a theory of a multidimensional rehabilitation counseling profession. References are included throughout this volume.

365. Nietupski, John; Hamre-Nietupski, Susan; Clancy, Patrick; & Veerhusen, Karen (1986).

Guidelines for making simulation an effective adjunct to in vivo community instruction. <u>Journal of the Association for Persons with Severe Handicaps</u>, <u>11</u>(1), 12-18.

vocational training / simulation training / in vivo instruction / community integration

A recent controversy has arisen over the relative merits of simulated versus in vivo community instruction. The view presented here is that in cases where in vivo instruction alone is unfeasible, practitioners should employ both training formats in a concurrent fashion. Accordingly, five guidelines for making

simulated instruction a more effective adjunct to community instruction are presented and discussed. Future research needs in this area also are suggested.

The differences in inappropriate behavior and instructional interactions in sheltered and nonsheltered work environments.

The Journal of the Association for Persons with Severe Handicaps, 11(1), 19-27.

work behavior / sheltered workshops / productivity

The purpose of this study was to examine and compare the nature and frequency of the instructional interactions and work-related behavior of 15 workers in nonsheltered vocational environments to 15 workers in sheltered environments. Workers in nonsheltere and sheltered environments were observed using a discontinuous time sampling procedure for approximately three 1-hour sessions. Data were collected during work and break times on instructional interactions between the workers with disabilities and their co-workers and supervisors. Additionally, data were collected on the frequency of eight categories of behavior labeled as inappropriate by observers. The results revealed that the workers in nonsheltered environments engaged in significantly more instructional interactions with supervisors and exhibited significantly fewer occurrences of inappropriate behavior.

367. Kayser, Joan E.; Billingsley, Felix F.; & Nee Richard S. (1986).

A comparison of in-context and traditional instructional approaches: Total task, single trial versus backward chaining, multiple trials. <u>Journal of the Association for Persons with Severe Handicaps</u>, <u>11</u>(1), 28-38.

special education / generalization / chaining / task analysis

The effects of two instructional strategies were compared in a combined, multiple baseline-crossover design. Total task, single trial instruction and backward chaining, multiple trials instruction were used in a program designed to teach eight children with severe handicaps how to make a snack. Students' behaviors were assessed in both training and generalization settings. Total task, single trial instruction resulted in clearly superior acquisition of independent steps in the training setting for three of the eight students and less substantial effects for two students. For three students, differences between the two methods were negligible or nonexistent in terms of independent steps. In

all cases, instructional time was substantially less for total task, single trial instruction than for backward chaining, multiple trials instruction. Findings related to generalization were mixed. Implications and limitations are discussed and issues for future research are delineated.

Adult leisure education for the independent use of a community recreation center [Brief report]. <u>Journal of the Association for Persons with Severe Handicaps</u>, 11(1), 39-44.

independent living / leisure skills / Minnesota

The purpose of this study was to implement and evaluate a leisure education training program designed to teach the complete and functional use of a community recreation center to two adults with severe mental retardation. Since these individuals resided in a group home in close proximity to the recreation center, this recreation program was deemed socially valid by group home and park board staff. Community recreation center use by nonhandicapped citizens of the neighborhood was utilized in this program as the training standard.

Within a multiple baseline design across three recreational activities involving the recreation center, the participants acquired the skills necessary to access and use the recreational facility without the presence of the care provider. Results demonstrated that individuals with severe mental retardation could (a) acquire age-appropriate leisure skills to independently use a neighborhood center; (b) access a neighborhood recreation center in the absence of the residential care provider; and (c) partially, but effectively, interact with agency staff concerning personal preferences of recreational activities.

Reported factors contributing to job terminations of individuals with severe disabilities. <u>Journal of the Association for Persons</u> with Severe Handicaps, <u>11</u>(1), 45-52.

job retention / productivity / social skills

This study examined factors reported to contribute to job terminations of adults with disabilities. Fifty-one terminations were investigated utilizing three job termination categories. The most frequently reported causes for job loss were problems in the areas of character and/or production. Social awareness, character,

and/or production accounted for more than 80% of all terminations. Results indicated that the majority of job terminations were due to reasons classified as social reasons, and when production problems were reported, the presence of social problems was associated with a greater likelihood of job terminations.

Do we know enough to plan for transition? A national survey of state agencies responsible for services to persons with severe handicaps. <u>Journal of the Association for Persons with Severe Handicaps</u>, 11(1), 53-60.

transition / program development / interagency cooperation

Transition of students with severe handicaps from school to community life has become a principle concern of parents, advocates, and professionals. The failure of students with disabilities to access appropriate vocational and residential services following school has highlighted the need for comprehensive transition planning at both an individual and systems level. Through interviews with state administrators of educational, vocational, and residential services, this study attempted to define the scope of the postschool service needs of individuals exiting public school programs on a national level. The results of the survey are discussed in terms of the implications for state agencies in effectively planning the transition of students with severe handicaps from school to postschool services.

Training severely handicapped students to cross partially controlled intersections. <u>AAESPH Review</u>, 4(3), 264-273.

independent living / behavior modification / street crossing

In this study three severely handicapped school-aged students were trained to cross the street. The students were provided preinstruction, instructional feedback, and selective repeated practice to acquire the skills to cross the street at partially controlled intersections; selective repeated practice was introduced only when physical assistance was required on those skills students found particularly difficult to learn; a rehearsal and model phase was eventually used to promote independent street crossing. Results of the multiple baseline design indicated that instructional feedback was sufficient in training the approach and walk behaviors, but selective repeated practice was required to establish the look responses. Future research is suggested in the areas of training two-behavior versus four-behavior chains, using repeated practice to facilitate acquisition and teach independent decision making to severely handicapped students.

Spears, Debora L.; Rusch, Frank R.; York, Robert; & Lilly, M. Stephen (1981).

Training independent arrival behaviors to a severely mentally retarded child. <u>Journal of the Association for the Severely Handicapped</u>, 6(2), 40-45.

independent living / arrival behavior / behavior modification

The present investigation sought to teach a sequence of arrival behaviors to a severely mentally retarded child living in an institution. The sequence consisted of three behavior clusters: walking to the building from the school bus, locating the bedroom and depositing a schoolbag and coat, and locating and entering a playroom. A multiple baseline design with a reversal component was used. In multiple baseline fashion, pacing prompts were introduced on selected subtasks in two of the three behavior clusters, with a resulting increase in independence in arriving home from school. Withdrawal and reintroduction of the pacing prompts, representing the reversal component, unequivocally established that increases in independent arrival behavior were attributed to the pacing prompts.

1.1

Project PROGRESS / Pennsylvania / vocational special needs education

The purpose of this manual is to assist agencies in the development, implementation and maintenance of a competitive work skills training and placement program for severely developmentally disabled youths. It reflects the philosophy of the PROGRESS model which is designed to broaden the scope of vocational special needs education for developmentally disabled individuals and prepare these individuals to become productive members of the work force. This manual is divided into nine sections: PROGRESS model, staff qualifications and responsibilities, clientele referral, job procurement, dynamic assessment, school to work linkages, reviewing placement, linkage to the Office of Vocational Rehabilitation, and additional agency support.

Workforce 2000: Work and workers for the 21st century. Indianapolis, IN: Hudson Institute, Inc.

labor supply / social predictions / policy research / Workforce 2000

The purpose of this research study, commissioned by the U.S. Department of Labor, is to provide basic information on the future labor market and employment trends, so that evaluation of current public policies can be made and new policy initiatives undertaken. The following four key trends have been identified by the Hudson Institute researchers as ones which will shape the last years of the 20th century: (a) the American economy should grow at a relatively healthy pace, (b) U.S. manufacturing will be a much smaller share of the economy in the year 2000, (c) the workforce

will grow slowly, becoming older, more female, and more disadvantaged, and (d) the new jobs in service industries will demand much higher skill levels. Figures and tables illustrate findings throughout this monograph.

382. Cole, Robert E. 1987.

Moving persons with disabilities into workforce 2000. 1987 Mainstream Annual Conference Keynote Address, Washington, DC.

labor supply / social predictions / job matching / Project LINK / Workforce 2000

In his keynote address, Cole addresses the challenge which the Workforce 2000 study (see Entry No. 381) presents with projected statistics on employment and a shrinking workforce. If the disability community is to become a factor in the future then the level of consciousness of the employer community about the reliability, performance, and productivity of the disabled worker has to be raised. He suggests ways in which this can be accomplished, including promoting computerized job banks which match disabled workers to openings in business/industry.

383. Brock, William E. (1988).

Workforce 2000 agenda recognizes lifelong need to improve skills. Monthly Labor Review, 3(2), 54-56.

labor supply / social predictions / Workforce 2000

Former Secretary of Labor William Brock discusses the findings and implications of the Labor Department's study, "Workforce 2000." Particularly, he points to the "window of opportunity" which will open to minority youth, handicapped, and others with longstanding employment problems as a result of a convergence of trenus which will cause a shortage of workers, particularly at the entry level.

<u>Parent training guide</u>. Honolulu, HI: Hawaii Transition Project. Department of Special Education. University of Hawaii-Manoa. (Comp. No. 84.158A - OSERS File No. 25)

parent involvement / Hawaii / individualized transition plans

This guide is designed to assist parent trainers and workshop sponsors to implement training which will provide parents of disabled adolescents and young adults with basic knowledge needed to plan effectively for the future of their sons/daughters. The guide has two major components: (a) a workshop planning manual, and (b) parent training modules. The planning manual can be used to facilitate decision making regarding workshop planning variables, e.g., audience selection, identification of goals and objectives, workshop scheduling, publicity, and evaluation. The material in the seven modules found in component two of the guide was utilized in Hawaii by the Hawaii Transition Project and the Special Parents' Network (SPIN) to acquaint parents of Hawaii's special needs youth with concerns surrounding the transition of disabled youth from secondary schools into adult community environments.

A study of selected post-school employment patterns of handicapped and nonhandicapped graduates and dropouts. (Doctoral dissertation, University of Illinois, 1987).

dropouts / follow-up studies / employment outcomes / High School and Beyond: Λ national longitudinal study for the 1980's

This study investigated the post-school employment patterns of handicapped and nonhandicapped graduates and dropouts in the 1980 sophomore cohort of the second follow-up files of High School and Descriptive and inferential statistical methods were used to examine the factors associated with employment status, type of first job held after high school, hours worked per week, income earned, and duration of employment. A unique feature of this study is its examination of the population of high school dropouts with specific handicapping conditions. Based on the results, individuals with mild handicaps, who were most likely mainstreamed, appear not to share the dramatically low employment rates and specific outcomes reported for those with moderate or severe handicapping conditions. However, it is apparent that certain patterns exist in selected educational and employment measures that suggest lower levels of achievement and performance among those who identified themselves as handicapped in comparison to their nonhandicapped peers. The implications for transition policy and practice are to modify the traditional career attainment options and pathways thought to encompass most individuals with disabilities.

Measuring pupil progress toward the least restrictive alternative. Learning Disability Quarterly, 2(4), 81-91.

individualized education program (IEP) / special education

Urgent discussions of how to measure student progress toward special education program goals have begun to appear with greater frequency. The factors that seem to be most influential concerning pupil progress measurement are those associated with PL 94-142. Now, IEP's must be written that include specific objectives and time lines for monitoring program success. In addition, the "least restrictive environment" requirement implies that objectives be written, and progress be monitored relative to the skills required for placement and maintenance in the regular classroom. The present paper outlines the uses of pupil progress measurement, the

desirable characteristics of progress measurement systems, and includes an evaluation of the adequacy of currently available data systems. Finally, two relatively recent alternatives to pupil progress measurement are recommended.

A framework for comprehensive evaluation of the individualized education program (IEP). <u>Learning Disability Quarterly</u>, 3(3), 49-55.

individualized education program (IEP) / evaluation

This article describes an Evaluation Framework that allows for comprehensive evaluation of the individualized education program (IEP). Within the Framework. IEP evaluation is seen as a multifacedted process, undertaken by an IEP evaluator, in order to provide evaluation information to IEP planners and implementers on various aspects of the IEP. Thus, through the systematic use of the Framework, information is obtained about the design of the IEP by means of an evaluability assessment; information about the operations of the IEP by means of a process evaluation; information about the usefulness of the IEP by means of a consumer evaluation. The discussion focuses on appropriate utilization of each evaluation strategy. In addition, several potential problems related to implementation of the Evaluation Framework are highlighted and suggestions are offered for their resolution.

Help Wanted [Videocassette]. Whittier, CA: Career Assessment & Placement Center. (Comp. No. 84.158A - OSERS File No. 21)

California / community integration / vocational training / independent living

This video provides prospective employers of the Career Assessment & Placement Center's clients the chance to see what services the Center can provide to them in the way of training and job coaches support, and subsequent cost-effectiveness benefits. Situational assessment of clients is provided in real work settings so as to maximize matching the individual to the appropriate job. Employers and employees are interviewed.

396. Du Pont de Nemours and Company (1982).

Equal to the task: 1981 Du Pont Survey of Employment of the Handicapped Wilmington, DE: Author.

Du Pont de Nemours and Company / employer involvement / advocacy / accommodations

This booklet describes the 1991 survey conducted by Du Pont of its handicapped employees' performance as compared to nonimpaired co-workers. In safety, job duties, and attendance, the

handicappped hold their own. Results bear out the conclusion that, given the opportunity, handicapped employees are "equal to the task." Findings from this survey can provide direction for future hiring and placement practices of handicapped personnel.

397. Okolo, Cynthia M.; & Sitlington, Patricia (1986).

The role of special education in LD adolescents' transition from school to work. <u>Learning Disability Quarterly</u>, 9(2), 141-155.

learning disabilities / special education / transition

Despite increasing interest in the transition of handicapped youth from school to postsecondary training and employment, available data indicate that few secondary-school special education programs provide relevant services. This article gives a rationale for and a delineation of the types of services which can facilitate the transition process for learning disabled (LD) adolescents. First, the authors review recent studies of LD individuals' vocational adjustment and identify the skills needed for successful transition to the world of work. Current practices in secondary special education and vocational education are then discussed. The authors conclude that secondary special education programs should provide six types of vocationally relevant activities: (a) occupational awareness, exploration, and basic work experience; (b) indepth career/vocational assessment; (c) instruction in job-related academic skills; (d) instruction in job-related interpersonal skills; (e) support services to other disciplines involved in vocational programming; and (f) post-school placement and follow-up. Finally, recommendations for personnel preparation and future research are suggested.

Post-secondary community placement of handicapped students: A five-year follow-up. <u>Learning Disability Quarterly</u>, 9(4), 295-303.

follow-up studies / rural areas / community integration / Nebraska

This article summarizes data from a five-year longitudinal study involving 108 ...oderately to severely handicapped students who graduated from rural schools employing a community-based vocational program model providing job exploration and job training. The purpose of the study was to evaluate the students' post-graduation living and work status and to determine the relationship between

this status and 19 predictor variables including student characteristics, school variables, and environmental characteristics.

399. McGuire, Joan M.; & Shaw, Stan F. (1987).

A decision-making process for the college-bound student: Matching learner, institution, and support program. <u>Learning Disability</u> <u>Ouarterly</u>, <u>10</u>(2), 106-111.

learning disabilities / post-secondary education / parent involvement

Often students, parents and high-school personnel become frustrated in their efforts to track down valid information about support services for LD students on college campuses. This article describes a process designed to help college-bound LD students select a college or university. Three major components should be explored when searching for appropriate postsecondary programs for LD students: (a) characteristics of the LD student, (b) characteristics of the institution, and (c) characteristics of the LD support program. By investigating these variables systematically, college-bound LD students will is better prepared to make an informed decision about their future educational and career goals.

400. Ferguson, Dianne L.; & Ferguson, Philip M. (1986).

The new victors: A progressive policy analysis of work reform for people with very severe handicaps. <u>Mental Retardation</u>, <u>24</u>(6), 331-338.

vocational training / supported work / community integration /
policy research

Current efforts to reform vocational services for adults with severe disabilities were examined from a historical context of past reform efforts and in relation to larger economic concerns. The meaning of work and the state of the labor force were discussed to establish the need for more comprehensive reforms than are generally called for in the literature. The danger is the unintended exclusion from community participation of those people with the most severe and multiple disabilities through the continued reliance on economic utility as the price of social integration. Suggestions were made for future research, policy, and practice that could help avoid the mistakes of past reform efforts.

Brickey, Michael P.; Campbell, Kenneth M.; & Browning, Lynne J. (1985).

A five-year follow-up of sheltered workshop employees placed in competitive jobs. Mental Retardation, 23(2), 67-73.

follow-up studies / competitive employment / attitudes / parent involvement

Personal interviews conducted in January, 1983 and agency records were used to examine month-by-month vocational histories of 53 sheltered workshop employees placed in competitive jobs in calendar year 1978. Most participants who were still employed after 4-5 years had parents who wanted them to work competitively and had a great deal of influence over them, while those who returned to the workshop or were unemployed did not have such parental support. The study also examined attitudes toward work, friends, advocates, use of community resources, and fiscal considerations.

Work attendance in competitive employment: Comparison between employees who are nonhandicapped and those who are mentally retarded. Mental Retardation, 23(3), 142-147.

competitive employment / work attendance / social comparison

Work attendance data for individuals who are mentally retarded and nonhandicapped and employed as food service workers in a large midwestern university were examined over a three-year period. No statistically significant differences were found between the workers who are mentally retarded and their nonhandicapped peers across the variables of unexcused absences, excused absences, and sick leave. The nonhandicapped employees were found to work a significantly greater amount of overtime than employees who are mentally retarded and also took significantly more vacations. Differences in terms of financial costs to employers are discussed with a view toward identifying implications for training individuals who are mentally retarded.

403. Davies, Roger R.; & Rogers, Erna S. (1985).

Social skills training with persons who are mentally retarded. Mental Retardation, 23(4) 186-196.

social skills / communit, integration / deinstitutionalization

The placement of institutionalized persons with mental retardation in the community has resulted in increased interest in social skills. If persons with mental retardation are to participate in activities with members of their community, they will need to develop skills that promote social interaction. Currently, however, there is little evidence to suggest that deinstitutionalized clients are being adequately integrated into the community. This article will review social skills interventions that have been attempted with persons with mental retardation, beginning with the less complex skills and moving to the multifaceted skills. Summary tables are presented which list the skill(s) taught, the instructional methods used, the effectiveness of the intervention and the generalization effects.

404. Dudley, James R.; & Schatz, Mona Struhsaker (1985).

The missing link in evaluating sheltered workshop programs: The clients' input. Mental Retardation, 23(5), 235-240.

sheltered workshops / program evaluation / quality of work life (QWL)

Clients of sheltered workshop programs are seldom consulted about how these programs are helping them, in part because of the inadequacy of existing methods for eliciting their views. In this ethnographic study, 16 clients of a sheltered workshop were consulted about their work roles and program. The findings reveal their confusions about the workshop's role in helping them, and describes their perspectives on whether to leave the workshops for "outside jobs." Suggestions are provided for enhancing the clients' evaluative role based on the findings and the ethnographic techniques used in the study.

Leadership functions in a work-group clique of adults with mental retardation. Mental Retardation, 24(6), 339-345.

sheltered workshops / social structure / work behavior

The functions of a clique and informal levers in a work group at a sheltered workshop for adults with menta: retardation were examined using ethnographic methods. Two prominent leaders were identified: (a) an instrumental leader (the central figure in an elite clique that influenced social interactions among work-group members) and (b) a socioemotional leader, who helped maintain group cohesion. The elite clique was both respected and resented by

other group members and was very important to the maintenance of group integrity. Both the leadership roles and the clique allowed group members to initiate action within a standing social structure that was not under direct staff influence.

Organizational barriers to productivity, meaningful wages, and normalized work opportunity for mentally retarded persons. <u>Mental Retardation</u>, <u>21</u>(4), 157-163.

barriers / productivity / sheltered workshops

Sheltered vocational services for mentally retarded persons are analyzed from several organizational, philosophical, and programmatic perspectives. Targets for remedial action are identified.

416. Brickey, Michael; Browning, Lynne; & Campbell, Ken (1982).

Vocational histories of sheltered workshop employees placed in projects with industry and competitive jobs. Mental Retardation, 20(2), 52-57.

normalization / job placement / Projects With Industry (PWI)

Job placement histories of 73 sheltered workshop employees placed in Projects With Industry (PWI) or competitive jobs in calendar year 1978 are examined during a 30 month period. Of the 27 people placed in PWI positions, 48% are subsequently placed in competitive jobs. Of the 53 competitive placements in 1978, 60% are competitively employed 7-1-80. Job variables such as structure appear to be more important to job success than employee demographic variables such as IQ. Two alternatives to individual job placements are discussed.

417.
Turnbull, Ann P.; & Turnbull, H. Rutherford, III (1982).

Parent involvement in the education of handicapped children: A critique. Mental Retardation, 20(3), 115-122.

parent involvement / Education for All Handicapped Children Act of 1975 / policy research

The policy and legislative (P.L. 94-142) assumptions underlying parent participation in the education of handicapped children are examined in the light of recent research on parent participation. It is argued that the assumptions are pased more on what some advocates and policymakers think parents ought to be and do than on universally held parent preferences for participation. A model of parent participation -- graduated according to degrees of participation based on an individualized involvement wherein parents determine the extent of their involvement -- is advanced.

418. Kohr, Melinda A.; Parrish, John M.; Neef, Nancy A.; Driessen, Joan R.; & Hallinan, Patricia C. (1988).

Communication skills training for parents: Experimental and social validation. <u>Journal of Applied Behavior Analysis</u>, <u>21</u>(1), 21-30.

parent involvement / social validation / communication skills
training

Coordination of professional services on behalf of children often hinges on the involvement of informed parents. The purposes of this study were to identify and experimentally and socially validate skills required of parents for effective communication with professionals. Target skills were identified on the basis of judges' social validation ratings of (a) sample interactions between parents and professionals and (b) the behaviors comprising a resultant task analysis. Eight parents were then trained in these skills via an instructional package. Results of a multiple baseline design across subjects and grouped skill domains showed that each parent acquired the targeted skills during simulated conferences and that correct responding usually generalized to actual conferences. Independent judges validated training outcomes, and participating parents indicated satisfaction with the curriculum.

419. Foss, Gilbert; & Peterson, Susan L. (1981).

Social-interpersonal skills relevant to job tenure for mentally retarded adults. Mental Retardation, 19(3), 103-106.

social skills 'job retention / sheltered workshops

Social-interpersonal behavior areas most relevant to job tenure for mentally retarded adults are identified. Respondents to a questionnaire designed to identify these behavior areas are 64 job placement personnel in sheltered workshops in 11 western states. A high level of agreement among the respondents is noted. Three of the four areas identified as most relevant to job tenure for mentally retarded adults are concerned directly with the supervisor-worker relationship.

Fast food employment for moderately and mildly retarded adults: The McDonald's Project. <u>Mental Retardation</u>, <u>19</u>(3), 113-116.

job retention / disincentives to work / fast food industry

To reduce employee turnover (175% crew turnover in 1979), McDonald's restaurants entered into a project with the Franklin County Program for the Mentally Retarded. Seventeen moderately and mildly retarded sheltered workshop employees were trained and placed in McDonald's restaurants. One year year later, 10 were still employed (turnover rate of 41%). Three of seven who left

í.`

did so to take full-time jobs. Second year turnover was 0%. Participants' net incomes for part-time employment (after deduction of taxes, bus fare and eventual discontinuation of Social Security and/or Supplemental Security Income benefits) were substantially lower than if they had stayed at the workshop. The study points out the employability of moderately and mildly mentally retarded adults in fast food restaurants and the need for financial incentives and/or full-time employment to make such employment financially advantageous.

421. Walls, Richard T.; Crist, Kerry; Sienicki, Deborah A.; & Grant, Lyle (1981).

Prompting sequences in teaching independent living skills. Mental Retardation, 19(5), 242-245.

independent living / chaining

The effects of three prompting sequences on the acquisition of independent living skills with mild and moderately mentally retarded vocational rehabilitation clients are examined. A least-to-most restrictive sequence, a most-to-least restrictive sequence and a within-mode physical guidance fading procedure were examined. Higher aptitude subjects made fewer errors, made a greater proportion of correct responses and required less time to master the tasks. However, no differences were attributable to the prompting sequences.

The definition of developmental disabilities: A concept in transition. Mental Retardation, 19(6), 259-265.

Developmental Disabilities Act (PL 95-602) / policy research / program development

The definition of developmental disabilities clarifies the functional intent of the Developmental Disabilities Act (PL 95-602), but it raises many questions. Issues discussed include the advantages of labeling, individualizing, and the prescriptive potential of the definition. Problems include complexities in implementation, inconsistencies in the Act itself, and a reduced constituency. There is also a possibility that the definition over-emphasizes severity and that the developmental distinction may be obsolete. Implications of all these issues and the potential leadership role of the developmental disability program in coordinating services for all disabled persons are discussed.

Work evaluation and the mentally retarded: R2view and recommendations. Mental Retardation, 15(4). 25-27.

vocational evaluation / job placement / work samples

The use of work samples as predictors of vocational behavior with the mentally retarded has become widespread practice during the past decade, often resulting in questionable evaluation and job placements. This article reviews the work sample batteries presently in use and offers a critical analysis of their role with mentally retarded persons, along with recommendations for more appropriate use in evaluation and training.

428. Yoshida, Roland K.; & Gottlieb, Jay (1977).

A model of parental participation in the pupil planning process. Mental Retardation, 15(3), 17-20.

parent involvement / special education

Most due procer: systems stress the formal hearing which occurs after special education placement has been 'ecommended. However, it may become necessary to involve parents prior to this decision because of the passage of P. L. 94-142, which mandates 'rental participation during the development of an individualiz a education

plan. A model is presented to enable school systems to classify their current practices vis a vis parental involvement during the pupil planning process and to serve as a guide for future activities that bear on the issue of parental involvement in school-related decision making.

429. Friedenberg, William P.; & Martin, Andrew S. (1977).

Prevocational training of the severely retarded using task analysis. <u>Mental Retardation</u>, <u>15(2)</u>, 16-20.

task analysis / pre-"cational skills

Two severely retarded students were trained on a task requiring multiple, multidimensional discrimination. Two procedures for accomplishing the task were subject to task analysis and training procedures for each devised. Each student was trained on both a hand and machine procedure for stapling labels on plastic bags. Subsequent production tests suggested that tangible reinforcement may be a nacessary ingredient in maintaining low-error performance with an inherently non-reinforcing task. Recommendations are made for incorptn analysis of tasks prior to setting up training programs.

Kortering, Larry J.; & Edgar, Eugene B. (1988).

Vocational rehabilitation and special education: A need for cooperation. Rehabilitation Counseling Bulletin, 31(3), 178-184.

vocational rehabilitation / special education / interagency cooperation

The primary purpose of this study was to establish a database on the post-school employment status of handicapped students throughout Washington state. Comparison was made of post-school status of subpopulations in special education (by disability) in terms of employment history, current employment status, wage rates, use of the Division of Vocational Rehabilitation (DVR), and successful jcb-search methods. Results indicate a need for more widespread use of vocational rehabilitation services.

431. Knapc-yk, Dennis R.; Johnson, William A.; & McDermott, Gregory (1983).

A comparison of the effects of teacher and peer supervision on work performance and on-task behavior. <u>Journal of the Association for Persons with Severe Handicaps</u>, 8(4), 41-48.

peer involvement / prevocational skills / productivity

This study avaluated the effectiveness of teacher and peer supervision in increasing levels of on-task behavior and work performance in a prevocational setting. Six severely retarded individuals served as subjects and were assigned an assembly task. Results indicated that close supervision by either a teacher or peer was superior to the baseline condition. In addition, results showed that peer supervision produced higher levels of on-task behavior among subjects than did teacher supervision. It was suggested that delegating some student supervisory responsibilities permits a teacher to use instructional time more efficiently and affords the supervising peer an opportunity to learn valuable work-related skills.

Brown, Lou; Shiraga, Betsy; York, Jennifer; Kessler, Kim; Strohm Beth; Rogan, Patty; Sweet, Mark; Zanella, Kathy; VanDeventer, Pat; & Loomis, Ruth. (1984).

Integrated work opportunities for adults with severe handicaps: The extended training option. <u>Journal of the Association for Persons with Severe Handicaps</u>, 9(4), 262-269.

quality of life / community integration / Extended Training Option / income

One major reason why those adults with the most severe intellectual handicaps are prevented from performing meaningful work in nonsheltered environments is the requirement that they cannot do so unless they receive direct pay. Unfortunately, as long as direct pay is an admission requirement to the real world of work, confinement to unnecessarily costly, anti-habilitative, and counterproductive segregated facilities and prevocational programs that never lead to real work in the real world will prevail. highly selective and closely monitored use of an Extended Training Option is offered as a reasonable procedure that can be used to arrange for nonsheltered functioning while the attitudes and skills necessary for direct pay are developed. Specifically, workers with severe intellectual handicaps should be placed in lonsheltered vocational environments, unless health considerations are contraindicated. Then they should be taught to perform meaningful work. Then all reasonable attempts to secure contingent direct pay should be made. Direct pay can no longer function as a barrier to integrated work opportunities.

433.
Bellamy, G. Thomas; Rhodes, Larry E.; Wilcox, Barbara; Albin, Joyce M.; Mank, David M.; Boles, Shawn M.; Horner, Robert H.; Collins, Michael; & Turner, Joe. (1984).

Quality and equality in employment services for adults with severe disabilities. <u>Journal of the Association for Persons with Severe Handicaps</u>, 9(4), 270-277.

income / supported work / quality of life / community integration

This paper responds to Brown et al (1984) (see Entry No. 432), who propose an extended training program involving work without pay in integrated settings for adults with severe intellectual handicaps. While agreeing about the capability of persons with disabilities, the importance of integration, and the failings of typical services, we believe that their extended training proposal represents an unnecessary retreat from values that have guided development of exemplary school and community services for persons with severe handicaps. As an extended outcome of services, the proposed program meedlessly sacrifices wages and other employment benefits, distorts the benefits of integration by looking only at the workplace, and tolerates unequal treatment of citizens with severe handicaps. Relying on unpaid work as a strategy for time-limited employment preparation creates the risk of overuse and of perpetual readiness programming, suggesting that professional effort could be better spent in development of supported employment opportunities. Current federally supported employment initiatives provide a framework for combining wages and integration and offer support for local program development.

Bates, Paul; Morrow, Sue Ann; Pancsofar, Ernest; & Sedlzk, Robert (1984).

The effect of functional vs. non-functional activities on attitudes/expectations of nun-handicapped college students: What they see is what we get. <u>Journal of the Association for Persons with Severe Handicaps</u>, 9(2), 73-78.

attitudes / community integration / curriculum

Six sections of a general education class for prospective teacher trainees were randomly assigned to one of two groups (N=162). Each group was exposed to an identical audiotaped/slide presentation of a special education program involving a young woman with Down's Syndrome. However, the slides accompanying one group's taped presentation consisted of functional, integrated, and aye appropriate curriculum activities and the slides a companying the other group's presentation included non-functional, segregated, and age inappropriate activities.

Prior to viewing the slide/tape presentation, all persons completed the Attitudes Toward Disabled Persons Questionnaire (ATDP) (Yuker, Block & Younng, 1966). After viewing the slides, the participants completed a teacher-made questionnaire regarding their attitudes and expectations toward a young woman with Down's Syndrome. The muitivariate analysis of variance resulted in no statistically significant differences between the two groups on the ATDP, but did result in statistically significant differences on the eight non-demographic items of the teacher-made questionnaire. Subsequent comparisons of individual questionnaire items revealed significant differences on those items which estimated IQ, future earning capacity, label of retardation, "best" residential environment, appropriate classroom placement, and most likely employment setting. These differences were in the direction of predicting higher levels of competence for the student when depicted as being involved in functional, integrated, and age appropriate activities.

435. Ford, Alison; & Mirenda, Pat (1984).

Community instruction: A natural cues and corrections decision model. <u>Journal of the Association for Persons with Severe Handicaps</u>, 9(2), 79-87.

community integration / social skills / behavior modification

Community environments offer a rich variety of stimuli to which severely handicapped students must learn to respond. Teaching procedures are needed that will draw a student's attention to the relevant cues and corrections as they naturally occur in the community. A decision model is presented which should allow teachers to intervene more systematically when students fail to respond to relevant cues and corrections.

Gaylord-Ross, Robert (1987).

<u>Final report: The Employment Retention Program: Richmond Unified School Discrict.</u> Richmond, CA: Richmond Unified School District. (Comp. No. 84.158A - OSERS File No. 20)

final report / Ca¹ifornia / Employment Retention Program

The final report of the Employment Retention Program, a transitional, supported employment project, describes the project and reviews the two-year outcomes. A 60% success rate for 50 students was reported. Discussion of negative terminations is included. References and appendixes are attached.

441. Storey, Keith; Bates, Paul; & Hanson, Harold B. (1984).

Acquisition and generalization of coffee purchase skills by adults with severe disabilities. <u>Journal of the Association for Persons</u> with Severe Handicaps, 9(3), 178-185.

community integration / independent living / task analysis

Six adults with severe disabilities were taught to purchase coffee in a community sit-down restaurant. Skills in the community were taught using a 46 step task analysis, a prompt hierarchy of least to greatest prompts, and social reinforcement. Generalization was assessed across two restaurants with similar characteristics and one with dissimilar characteristis (i.e., a fast food restaurant). At the completion of training, the people involved in the study demonstrated competencies equal to non-handicapped customers and they maintained these skills at a two to five month follow-up arsessment.

Maximizing social contact for secondary students with severe handicaps. <u>Journal of the Association for Persons with Severe Handicaps</u>, <u>11</u>(2), 11.-124.

social skills / secondary education / tutors

This article describes a secondary program for students with severe handicaps which attempts to maximize the social contact between handicapped and nonhandicapped persons. The program selectively ir egrates students into academic and other regular education courses. Nonhandicapped peers are used for tutoring purposes as

well as research assistants in a social skills training project. A survey completed by a variety of important others indicated substantial imporvements in the behavioral repertoires of the students with severe disabilities, particularly in the area of social skills.

Concepts and issues related to choice-making and autonomy among persons with severe disabilities. <u>Journal of the Association for Persons with Severe Handicaps</u>, 10(2), 79-86.

independent living / quality of lifa / decision making

This paper discusses issues related to concepts of preferences and choice-making among persons with severe disabilities. Included are suggestions for acknowledging preferences, teaching choice as a decision-making process, and the broader implications of choice-making among persons with severe handicaps as an expression of personal autonomy and dignity. Directions for future research are discussed.

444. Dattilo, John; & Rusch, Frank R. (1985).

Effects of choice on leisure participation for persons with severe handicaps. <u>Journal of the Association for Persons with Severe Handicaps</u>, <u>10(4)</u>, 194-199.

decision-making / leisure skills

The purpose of this investigation was to analyze the effect of choice on the behaviors of four children with severe handicaps. The investigation compared each individual's behaviors during participation in a chosen leisure activity (contingent participation) to behaviors during participation in the same leisure activity without the opportunity for choice (noncontingent participation). A multiple baseline, single-subject design was used that incorporated the introduction of three different conditions across subjects at different points in time. Changes were noted in the behaviors of attending and manipulation during each of the three conditions and were replicated across students to support the conclusion that there was a difference between the students' behaviors during their participation in a chosen leisure activity and their behaviors during participation in the same activity without choice.

Gleaning: Sheltered employment for retarded adults in rural areas. Mental Retardation, 16(2), 118-122.

rural areas / shclicered workshops

Gleaning, harvesting and similar activities may provide employment for retarded workers in rural areas. This paper delineates the economic parameters of a variety of such activities. A model for providing extended sheltered employment for severely retarded adults in rural areas is suggested and the advantages of the proposed model over more traditional approaches are discussed.

President's Committee on Employment of the Handicapped; U.S. Department of Education, National Institute on Disability and Rehabilitation; & National Council on the Handicapped (1987).

Parent-employer partnerships: Developing employment opportunities for youth with disabilities. (Report of a national conference, Alexandria, VA). Washington, DC: National Information Center for Children and Youth with Handicaps (NICHCY).

rarent involvement / employer involvement / interagency cooperation

The concepts and information presented in this conference document represent national trends in transition involvement by employers and parents.

The first section summarizes the expectations and perceptions of parents, employers, young people with disabilities, and service providers, giving an overview of basic concerns and identifying successful approaches and techniques for developing employment supportunities.

The second section outlines strategies, actions, and guidelines recommended by conference participants and others for adaptation by parents and employers to develop employment opportunities, find jobs and keep them.

The third section presents techniques and tools parents and employers can use to replicate the conference in their local

communities.

The fourth section contains listings of available resources and bibliography. An Appendix includes additional helpful information.

Daily decision-making in community residences: A social comparison of adults with and without mental retardation. American Journal on Mental Retardation, 92(5), 430-435.

decision-making / independent living / community integration

In addition to physical placement in the community, the extent to which individuals experience personal autonomy may provide a crucial measure of the attainment of a more normalized lifestyle. Everyday choices and choice-making opportunities of 24 persons with mental retardation living in community group homes were compared to choices of 42 nonretarded adults. The adults with mental retardation had significantly fewer opportunities to make decisions on such matters as what to eat or wear, how to spend free time, and with whom to live. Results were discussed in terms of the need to operationalize meaningful improvements in the lives of persons with mental retardation that go beyond the appearance of the physical environment.

The volunteer model of vocational habilitation as a component of the $^{\prime}$ institutionalization process. Mental Retardation, 15(4), 58-61.

deinstitutionalization / vocational training / volunteer mode;

A Volunteer Model for vocational habilitation programs is presented. The model is discussed as a component of the deinstitutionalization process emphasizi g the need for linkage mechanisms between large residential facilities and community settings. A demonstration of the Volunteer Model is presented in which five mentally retarded adolescents and adults served as community volunteers within a non-profit organization.

450. Becker, Ralph L. (1976).

Job training placement for retarded youth: A survey. Mental Retardation, 14(3), 7-11.

secondary education / vocational training / job placement

A survey was made to assess the types of jobs to which mentally retarded youth were assigned for on-the-job training. Forty work-study coordinators from 35 school districts in 12 states and the District of Columbia completed a questionnaire reporting on 1438 retarded youth who were enrolled in a work-study program for the school period 1972-1974. Trainees were assigned to 185 different jobs distributed among 14 major industries and a miscellaneous classification.

The new institutions: Last ditch arguments. <u>Mental Retardation</u>, 19(5), 215-220.

normalization / Nebraska / deinstitutionalization

A recent position taken by some mental retardation professionals poses a threat to the major gains made during the last two decades on behalf of mentally retarded persons. Their position holds that a substantial number of currently institutionalized persons are sub-trainable and should be assigned to enriched (institutional) living environments. This article refutes their ill-founded position through a brief review of national trends and a recent analysis of Nebraska's institutionalized mentally retarded population. This analysis clearly demonstrates that, given adequate and appropriate community-based alternatives, virtually all of Nebraska's -- and the nation's -- institutionalized, mentally retarded population can grow and develop in least restrictive, community alternatives.

452. Rosenthal, Irwin (1986).

New directions for service delivery for learning disabled youth and young adults. Learning Disabilities Focus, 2(1), 55-61.

learning disabilities / post-secondary education / personne' preparation

The increased accessibility of learning-disabled persons to higher education has created the need to address program development, student psychologial growth, parent adjustment, and transitional

needs. A new, federally funded (Office of Special Education and Rehabilitative Services) Master's Degree program has been developed to teach counselors and learning-disability specialists to address these needs.

Mental retardation: Community transition. Boston, MA: Little, Brown & Company.

mental retardation / special education / community integration / psychoeducational assessmen^t

This book offers multidisciplinary perspectives on mental retardation and provides ideas and concepts o improve teaching and assessment, and understand the complex problems associated with mental retardation. It emphasizes the belief that outcomes associated with mental retardation can be altered through systematic intervention by persons representing a range of disciplines. The unique contribution of this book is the focus on the historical outcomes of mental retardation and the emphasis on educational strategies that have been demonstrated to be effective in altering these outcomes. References are included.

Vocational special needs education: The what and how of providing effective technical assistance. <u>Interchange</u>, <u>8</u>(3), 1-4. Champaign, IL: Secondary Transition Intervention Effectiveness Institute. University of Illinois.

vocational special needs education / personnel preparation

This article addresses the critical need for vocational educators to provide effective learning environments within the regular vocational education setting for students with special needs. To do so program personnel have to have provided to them effective preservice and in-service training. Various ways to deliver this technical assistance to them are discussed, as well as other modes of technical assistance such as networking. Methodology and results of a study to investigate technical assistance needs of vocational special needs educators (conducted at the University of Illinois) conclude this article. References are included.

456. Coles, Gerald (1987).

The learning mystique: A critical look at "learning disabilities." New York: (Pantheon Books) Random House.

learning disabilities / special education / psychoeducational assessment

In this book, the author challenges the assumptions underlying the way schools use scientific theories to categorize children and develop educational policy. Documenting the limits of these assumptions, he suggests how "neutral" science can reinforce social biases. Coles argues that school failure cannot be separated from the learning environment and must be seen, and treated, as the product of interaction between social and family relationships, individual behavior, and different kinds of neurological function (not dysfunction).

TITLE INDEX

- A -

Access to leisure. - 275

Achieving outcomes: A guide to interagency training in transition and supported employment. - 246

Acquisition and generalization of coffee purchase skills by adults with severe disabilities. - 441

Adapting instructional materials for mainstreamed students. - 136

Adult leisure education for the independent use of a community recreation center. - 368

Adults with learning disabilities: Clinical studies. - 72

Agency resource guide: A resource guide for students in transition from school to the community and world of work. - 198

Aging and mental retardation: Extending the continuum. - 195

The aging parent with a home-living handicapped dependent: Issues and legal planning. - 17

An analysis of occupational requirements relative to the employment of severely handicapped individuals. - 227

An analysis of select psychometric properties of the Vocational Assessment and Curriculum Guide - 243

Analysis of seven behavioral dumains of independent living. - 223

An analysis of the effects of a self-control training program on the acquisition and generalization of social behaviors in a work setting. - 115

An analysis of the effects of a social skills training program using self-instructions on the acquisition and generalization of two social behaviors in a work setting. - 252

Annotated bibliography on community integration for people with severe disabilities. - 56

Annotated bibliography on transition from school to work. - 82

Annotated bibliography: Transition research on problems of handicapped youth. - $31\,\hat{s}$

Annual performance and financial reports: Developing Cooperative State Models to Meet the Transition Needs of Disabled Youth: An interagency approach. - 230

ARCA response on transition from school to work and on supported employment. - 321

Assessing & teaching job related social skills: A curriculum manual for students with mild handicaps. - 92

Assessing the quality of longitudinal surveys. - 333

Assessment of individuals with severe handicaps: An applied behavior approach to life skills assessment. - 77

Assimilating the learning disabled into a community college environment. Human Services Center. Final report. - 217

Assisting persons with severe disabilities to achieve success in integrated workplaces: Critical elements. - 53

Assisting the learning disabled: A program development and service delivery guide for university service providers, diagnosticians, tutors, counselors, and learning disabled students. - 29

-B-

Behavior management in work settings. - 387

Behavioral assessment of occupational skills of learning disabled adolescents. - 171

The best that you can be. - 394

Bridges from school to working life for handicapped youth: The view from Australia. - 158

-C-

Career aspiration models of adolescents and young adults: A comparison of handicapped and nonhandicapped students. - 9

Career decision making for adolescents and young adults with learning disabilities. - 109

Career development for persons with learning disabilities - 262

Career education for the learning disabled -- Where are we now? -393

Career exploration: A curriculum manual for students with mild handicaps. - 97

Career exploration: A curriculum manual for students with moderate/severe handicaps. - 98

Career focus: A curriculum manual for students with mild, moderate or severe handicaps. - 90

Career related interpersonal skills for special education students: A high school curriculum. - 209

Catalog of exemplary rehabilitation programs and practices. - 1

The changing workplace: Implications of quality of work life for vocational education. - 308

College education for mentally retarded adults. - 424

Communication skills training for parents: Experimental and social validation. - 418

The community classroom: Technological vocational training for students with serious handicaps. - 347

Community instruction: A natural cues and corrections decision model. - 435

Community integration for people with severe disabilities. - 194

Community residences for persons with developmental disabilities: Here to stay. - 193

Community-referenced instruction: Research and issues. - 345

A comparison of computerized job matching systems. - 155

A comparison of external and self-instructional teaching formats with mentally retarded adults in a vocational training setting. 278

A comparison of in-context and traditional instructional approaches: Total task, single trial versus backward chaining, multiple trials. - 367

A comparison of preschool and elderly community integration/demonstration projects at the University of Missouri Institute for Human Development. - 133

A comparison of the effects of teacher and peer supervision on work performance and on-task behavior. - 431

Compendium of project profiles 1987. - 81

Competitive employment for persons with mental retardation: From research to practice. - 121

Competitive Employment Through Vocational Experience (CETVE). Final report. - 201

Competitive employment training for mentally retarded adults: The supported work model. - 107

Competitive placement and training manual: PROGRESS. - 379

Compilation of statistical sources on adult disability. - 325

Composition, word processing, and the learning disabled college writer: An annotated bibliography. - 142

Computer programmer: Training for the disabled. - 69

Concepts and issues related to choice-making and autonomy among persons with severe disabilities. - 443

A conceptual framework and process for identifying the inservice needs of vocational educators serving special needs populations. - 290

Confessions of a community placement optimist. - 132

Contemporary issues in social skills research with mentally retarded persons. - 295

Contractor report: High school & beyond. Third follow-up (1986). Sample design report. - 377

Convergent-discriminant validity of the Jewish Employment and Vocational Service System. - 164

Cooperative Model for Planning and Developing Transitional Services for Handicapped Youth: Final evaluation report. - 215

Corridors to careers: A trainer's manual. - 125

Cost benefit analysis of placing moderately and severely handicapped individuals into competitive employment. - 319

A curriculum to foster understanding of people with disabilities: Staff orientation manual. - 35

A curriculum to foster understanding of people with disabilities: The handicapped in literature. - 36

A curriculum to foster understanding of people with disabilities: Science and health education perspectives on the handicapped. - 37

A curriculum to foster understanding of people with disabilities: The handicapped in society. - 38

A curriculum-based vocational assessment procedure: Addressing the school-to-work transition needs of secondary schools. - 350

-D-

Daily decision-making in community residences: A social comparison of adults with and without mental retardation. - 448

Dealing with dropouts: The urban superintendent's call to action. - 245

Death and dying: A group experience with MR/DD adults. - 12

A decision-making process for the college-bound student: Matching learner, institution, and support program. - 399

The definition of developmental disabilities: A concept in transition. - 422

Differences between public and private rehabilitation services and the professionals who staff them. - 302

The differences in inappropriate behavior and instructional interactions in sheltered and nonsheltered work environments. - 366

Different shades of grey. - 130

Digest of data on persons with disabilities. - 22

Disability and the labor market: Economic problems, policies, and programs. - 24

Dissemination manuals of programs. - 378

Do we know enough to plan for transition? A national survey of state agencies responsible for services to persons with severe handicaps. - 370

Early lessons from the Marion County demonstration in integrating vocational and mental health services. - 337

Earnings of deaf RIT graduates as reported by the Internal Revenue Service. - 323

The education evaluator's workbook: How to assess education programs. - 31

Educational and occupational outcomes of Hispanic learning-disabled high school students. - 297

Educational validity: Procedures to evaluate outcomes in programs for severely handicapped learners. - 344

Educator's guide to exemplary special education curricula: Results of a national field based survey (1987): Reinventing wheels. - 384

The effect of functional vs. non-functional activities on attitudes/expectations of non-handicapped college students: What they see is what we get. - 434

Effective microcomputer assisted instruction for the vocational education of special needs students. - 340

Effects of choice on leisure participation for persons with severe handicaps. - 444

The effects of self-instruction on on-task behavior and work performance in a vocational training setting. - $\hat{1}35$

Employer attitudes toward hiring the learning disabled. - 163

Employment of the handicapped through community involvement. - 16

Employment Training and Transition Project: Final report. - 301

The empowerment dynamic: Planning and implementing a support group network. - 34

Enclaves. - 126

An enriching experience. - 162

Equal to the task: 1981 Du Pont Survey of Employment of the Handicapped. - 396

Evaluating work performance by severely handicapped students in work experience settings. - 229

Evaluation report for Comprehensive Transition Model Vocational Training Program. - 376
